Uniflow® Valves & Strainers
Index

UNIFLOW Valves & Strainers: designed & produced to meet with our high quality standards.

COMEVAL offers a high level of service, flexibility and adaptability to the needs of customers, with a wide range of products for all markets, being one of the leading European companies in its line of Industrial Valves.

The company is fully committed to Quality in all areas of design, manufacturing and service, always involved in continuous process of improvement and certification. UNIFLOW® product range is PED 2014/68/EU Module H audited by Lloyd's Register. The company is as well ISO 9001 certified.

COMEVAL team combines the experience gained from being a company with over 40 years of background in the industry, with a young, dynamic team in all Departments.

COMEVAL belongs to ARI ARMATUREN and benefits from the synergies of the group, participating in a large number of projects handled by the most important Engineering Companies, used to successfully handle high demanding contracts with a devoted Projects Department to ensure compliance with most demanding requirements, and counts on a network of reliable partners that provide closer support to our end customers. Most of the products manufactured by COMEVAL are exported worldwide.

Our castings and forgings are sourced from quality suppliers specialized in the manufacture of high integrity pressure containing components, being independently and periodically audited directly by COMEVAL specialists.

All castings are visually inspected to meet the requirements of MSS SP-55 and rest of relevant standards. Materials are randomly subject to PMI (Positive Material Identification), LPT (Liquid Penetrant Test) and through test bars sent to independent laboratories to countercheck mechanical and chemical properties.

Further non-destructive testing such us Radiographic Examination, Ultrasonic Examination or Magnetic Particle Examination acc. to ASME B16.34 Section 8 and Appendices are performed when required by applicable standards, customer specifications and internal quality criteria.

Our Engineering Department is specialist in sizing and assembling any kind of actuators and accessories for our valves, as well as customizing special solutions for our customers.

Final product is subject to strict quality control, with visual and functional inspection and pressure testing. Our computerized testing facilities allow testing equipment with pressures higher than 500 bar.

Additionally, further testing on valves such as Fugitive Emission, Cryogenic, Fire, Nace, Drinking Water, etc. can also be carried out by our specialized subcontractors.

After final inspection & testing, our Quality Department issues a Material and Test Certificate according to EN 10204 3.1. We are also used to handle Third Party Inspections in our facilities. Valves are properly cleaned, protected and packed, ready for dispatch to our customers.

UNIFLOW Valves & Strainers: Certifications

COMEVAL is ISO 90001 certified for the whole cycle of valves & strainers life. Our certified Quality Management System covers design, manufacture, sales, after-sale service and repair.
UNIFLOW range is PED 2014/68/EU Module H, that covers all the production range up to category III.
UNIFLOW range is also certified for Russian market, with EAC approval.
We are also able to offer Fire Safe design and fire test qualification certificates for Ball Valves.
Further certificates such us API 6D are under appliance and will be obtained shortly!

Lloyd's Register LRQA

CERTIFICATE OF APPROVAL

This is to certify that the Quality Management System of:

COMEVAL VALVE SYSTEMS, S.L. y CIA., SOCIEDAD COMANDITARIA
Les Rotes, 15
46540 El Puig, Valencia
Spain

has been approved by Lloyd's Register Quality Assurance to the following Quality Management System Standard:

ISO 9001:2008

The Quality Management System is applicable to:

The design, manufacture, adjustment, test, distribution, after-sale service and overhauling of valves, fluid control equipment and heat exchangers.

Approval Certificate No: SGI 6028441
Original Approval: 28 September 2015
Current Certificate: 16 October 2015
Certificate Expiry: 14 September 2018

Issued by: LRQA España, S.L.
For and on behalf of: Lloyd's Register Quality Assurance Limited

Lloyd's Register

EC Certificate of Conformity

In accordance with the requirements of the Pressure Equipment Directive 97/23/EC

This is to certify that the Quality Management System of:

COMEVAL VALVE SYSTEMS, S.L. y CIA, Soc. Comandataria
Les Rotes, 15 P.I. EL PUIG
46540 EL PUIG (Valencia) SPAIN

has been assessed against the requirements of Annex III, Module H of the Pressure Equipment Directive 97/23/EC, and conforms to the requirements for the products shown below:

Design and Manufacture of Gate Valves, Globe Valves, Check Valves, Ball Valves and Strainers
(see attached schedule)

Approval is subject to the continued maintenance of the quality system in accordance with the requirements of the above Directive.

Authorisation is hereby given to use the LRV Notified Body Identification Number in accordance with the requirements of the specified Directive and Regulations in relation to the products as identified above.

Certificate No: 0038/PED/MAD/0146
Original Approval: 23 February 2015
Current Certificate: 23 February 2015
Certificate Expiry: 22 February 2018
LRV Notified Body Number 0038

José Rivero on behalf of Lloyd's Register Verification

Comeval

DECLARATION OF CONFORMITY / DECLARACIÓN DE CONFORMIDAD
as defined by / de acuerdo a
Pressure Equipment Directive 97/23/EC / Directiva de Equipos a Presión 97/23/CE

For the following Pressure Equipment / Para los siguientes Equipos a Presión:

Product / Producto:
GATE VALVES / VÁLVULAS DE COMPUERTA

Brand / Marca: (COMEVAL®)
Series: UNIFLOW 9_, 33_
Applicable Standards / Normas aplicables:
API 600, API 6D, ASME B16.34, API 602

Responsible for making this declaration / Responsable de esta declaración:
Authorized representative established within the EU / Representante autorizado en la UE
Company name / Nombre de Empresa:
COMEVAL VALVE SYSTEMS, S.L. y CIA. Soc. Comandataria
Company address / Dirección de Empresa: Les Rotes, 15 46540 EL PUIG (Valencia) SPAIN

We confirm by this declaration that the range of Gate Valves defined to the above series are products classified up to Category III, in conformance with the prescriptions of the Annex III Module H of the European Directive PED 97/23/EC.
Certificate of Conformity issued by Lloyd's Register Verification Limited, 71 Fenchurch Street London EC3M4BS UK, no. 0038, Certificate no.: 0034/PED/MAD/0146.
Declaramos que el rango de Válvulas de Compuerta incluido en las series anteriormente definidas son productos clasificados hasta Categoría III, en conformidad con las prescripciones del Anexo III Módulo H de la Directiva Europea PED 97/23/CE.
Certificado de Conformidad emitido por Lloyd's Register Verification Limited, 71 Frenchurch Street London EC3M4BS UK, nº 0038, Certificado nº: 0034/PED/MAD/0146.

This Declaration is signed in EL PUIG, on November 12, 2015.
Esta Declaración se firma en EL PUIG, a 12 de Noviembre de 2015.

COMEVAL VALVE SYSTEMS, S.L. y CIA Soc. Comandataria

Enrique Bort
Managing Director
Director General

ITIS B.V.

API6FA FIRE TEST QUALIFICATION CERTIFICATE

This certificate is to certify that the valve below has been tested in accordance with, and meets all requirements stated in API standard 6FA 3rd edition, April 1999, Reaffirmed: July 2006 Specification for Fire Test for Valves.

Test valve details	
Manufacturer	Comeval Valve Systems, S.L. y CIA.
Address	Les Rotes, 15, 46540 El Puig, Valencia, Spain
Brand	UNIFLOW
Nominal size	8inch
Pressure rating	150lbs
Flow direction	Bi-directional
Type	Trunnion mounted ball valve
Weight	255kg
Bore	Full bore
Body material	A105
Bonnet material	A105

CAST PRODUCTS

GLOBE VALVES

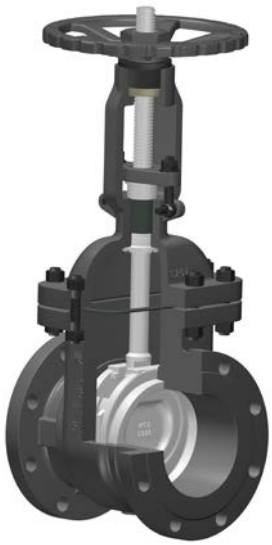
Series 80, 81, 82, 83, 84, 85, 86

2" - 24"
DN50 - DN600
Class 150-2500
PN16-420
Connections RF, RTJ, BW
BS 1873 / ASME B16.34 /
ASME B16.10 / EN 558 /
ASME B16.5 / EN 1092-1 /
ASME B16.25 / EN 12627 /
API 598 / EN 12266-1

Features/Options:
- Metal seated, unidirectional
- OS&Y, pressure seal design for high ratings
- Rising stem and handwheel
- Back seating design
- Parabolic plug for throttling/regulating function
- Threaded, welded or integral seat
- Operation by handwheel or gear
- Top arrangement for actuator assembly
- Pneumatic, electric or hydraulic actuation
- Lock device, chainwheel
- Position indicator, limit switches
- Packing with lantern ring
- Live load packing
- Bypass line, drain device available
- Jacketed body
- Extended bonnet and stem for cryogenic application
- Vacuum service design
- Manufacturing to NACE MR0175
- Special execution for outdoors/corrosive atmosphere, high temperature service, etc.

GATE VALVES

Series 90, 91, 92, 94, 33



2" - 48"
DN50 - DN1200
Class 150-2500
PN16-420
Connections RF, RTJ, BW
API 600 / API 6D / ASME B16.34 /
ASME B16.10 / EN 558 /
ASME B16.5 / ASME B16.47 /
EN 1092-1 / ASME B16.25 /
EN 12627 / API 598 / EN 12266-1

Features/Options:
- Metal seated, bidirectional
- OS&Y, pressure seal design for high ratings
- Rising or non-rising stem
- Back seating design
- Flexible or solid wedge
- Threaded, welded or integral seat
- Operation by handwheel or gear
- Top arrangement for actuator assembly
- Pneumatic, electric or hydraulic actuation
- Lock device, chainwheel
- Position indicator, limit switches
- Packing with lantern ring
- Live load packing
- Bypass line, drain device available
- Extended bonnet and stem for cryogenic application
- Jacketed body
- Vacuum service design
- Manufacturing to NACE MR0175
- Special execution for outdoors/corrosive atmosphere, high temperature service, etc.

Materials: Carbon steel, Low Carbon Steel, Alloy Steel, St. Steel & Exotic Materials, with wide variety of trims

Applications: Power, Oil&Gas, Process, Mining, Pharmaceutical, Chemical, Pulp and paper, Water and waste management

CAST PRODUCTS

SWING CHECK VALVES

2" - 36"
DN50 - DN900
Class 150-2500
PN16-420
Connections RF, RTJ, BW
API 6D / ASME B16.34 /
ASME B16.10 / EN 558 /
ASME B16.5 / ASME B16.47 /
EN 1092-1 / ASME B16.25 /
EN 12627 / API 598 /
EN 12266-1

Series 3S, 31

Features/Options:
- Metal seated
- Pressure seal design for high ratings
- Full bore design
- Counterweight and hydraulic
- Tilting design
- Jacketed body
- Special execution for outdoors/corrosive atmosphere, high temperature service, etc.

LIFT DISC (PISTON) CHECK VALVES

2" - 24"
DN50 - DN600
Class 150-2500
PN16-420
Connections RF, RTJ, BW
API 6D / ASME B16.34 /
ASME B16.10 / EN 558 /
ASME B16.5 / EN 1092-1 /
ASME B16.25 / EN 12627 /
API 598 / EN 12266-1

Series 3P, 32

Features/Options:
- Metal seated
- Pressure seal design for high ratings
- Full bore design
- Spring return for piston type
- Jacketed body
- Special execution for outdoors/corrosive atmosphere, high temperature service, etc.

Y-STRAINERS

2" - 24"
DN50 - DN600
Class 150-600
PN16-100
Connections RF, RTJ, BW
API 6D / ASME B16.34 /
ASME B16.10 / EN 558 /
ASME B16.5 / EN 1092-1 /
ASME B16.25 / EN 12627 /
API 598 / EN 12266-1

Series F0

Features/Options:
- Replaceable screen
- Screen made of wire mesh or perforated basket, with full range of available commercial widths/perforations
- Bolted cover or pressure seal cover for high sizes/ratings
- Special execution for outdoors/corrosive atmosphere, high temperature service, etc.

Materials: Carbon steel, Low Carbon Steel, Alloy Steel, St. Steel & Exotic Materials, with wide variety of trims

Applications: Power, Oil&Gas, Process, Mining, Pharmaceutical, Chemical, Pulp and paper, Water and waste management

FORGED PRODUCTS

GLOBE VALVES

Series 89, 88, 87

3/8" - 2"
Class 800-2500
Connections:
SW, NPT, BSPT, BSPP, RF
API 602 / ASME B16.34 /
ASME B16.11 / EN 12760 /
ASME B1.20.1 / EN 10226-1 /
API 598 / EN 12266-1

Features/Options:
- Metal seated, unidirectional
- OS&Y, pressure seal design for high ratings
- Rising stem and handwheel
- Back seating design
- Parabolic plug for throttling/regulating function
- Threaded, welded or integral seat
- Operation by Handwheel or Gear
- Top arrangement for actuator assembly
- Pneumatic, electric or hydraulic actuation
- Lock device, chainwheel
- Position indicator, limit switches
- Packing with lantern ring
- Live load packing
- Bypass line, drain device available
- Jacketed body
- Extended bonnet and stem for cryogenic application
- Vacuum service design
- Manufacturing to NACE MR0175
- Special execution for outdoors/corrosive atmosphere, high temperature service, etc.

GATE VALVES

Series 99, 98, 97, 96

3/8" - 2"
Class 800-2500
Connections:
SW, NPT, BSPT, BSPP, RF
API 602 / ASME B16.34 /
ASME B16.11 / EN 12760 /
ASME B1.20.1 / EN 10226-1 /
API 598 / EN 12266-1

Features/Options:
- Metal seated, bidirectional
- OS&Y, pressure seal design for high ratings
- Rising or non-rising stem
- Back seating design
- Flexible or solid wedge
- Threaded, welded or integral seat
- Operation by Handwheel or Gear
- Top arrangement for actuator assembly
- Pneumatic, electric or hydraulic actuation
- Lock device, chainwheel
- Position indicator, limit switches
- Packing with lantern ring
- Live load packing
- Bypass line, drain device available
- Extended bonnet and stem for cryogenic application
- Jacketed body
- Vacuum service design
- Manufacturing to NACE MR0175
- Special execution for outdoors/corrosive atmosphere, high temperature service, etc.

Materials: Carbon steel, Alloy Steel, St. Steel & Exotic Materials, with wide variety of trims

Applications: Power, Oil&Gas, Process, Mining, Pharmaceutical, Chemical, Pulp and paper, Water and waste management

FORGED PRODUCTS

SWING CHECK VALVES

3/8" - 2"
Class 800-2500
Connections:
SW, NPT, BSPT, BSPP, RF

ASME B16.11 / EN 12760 /
ASME B1.20.1 / EN 10226-1 /
API 598 / EN 12266-1

Series 39, 38, 37

Features/Options:
- Metal seated
- Pressure seal design for high ratings
- Regular port design
- Counterweight and hydraulic
- Tilting design
- Jacketed body
- Special execution for outdoors/corrosive atmosphere, high temperature service, etc.

LIFT DISC (PISTON) CHECK VALVES

3/8" - 2"
Class 800-2500
Connections:
SW, NPT, BSPT, BSPP, RF
API 602 / ASME B16.34 /
ASME B16.11 / EN 12760 /
ASME B1.20.1 / EN 10226-1 /
API 598 / EN 12266-1

Series 35, 34, 36

Features/Options:
- Metal seated
- Pressure seal design for high ratings
- Regular port design
- Spring return
- Jacketed body
- Special execution for outdoors/corrosive atmosphere, high temperature service, etc.

Y-STRAINERS

3/8" - 2"
Class 800-2500
Connections:
SW, NPT, BSPT, BSPP, RF
BS 5352 / ASME B16.34 /
ASME B16.11 / EN 12760 /
ASME B1.20.1 / EN 10226-1 /
API 598 / EN 12266-1

Series F9

Features/Options:
- Replaceable screen
- Screen made of wire mesh or perforated basket, with full range of available commercial widths/perforations
- Bolted cover or pressure seal cover for high sizes/ratings
- Special execution for outdoors/corrosive atmosphere, high temperature service, etc.

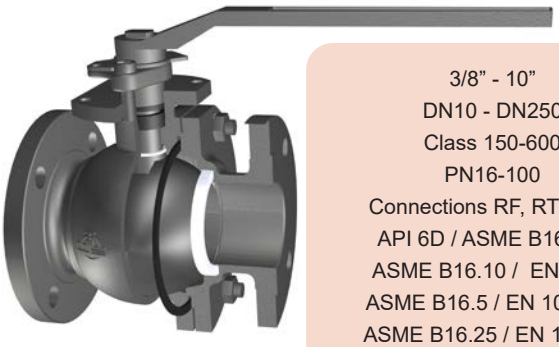
Materials: Carbon steel, Alloy Steel, St. Steel & Exotic Materials, with wide variety of trims

Applications: Power, Oil&Gas, Process, Mining, Pharmaceutical, Chemical, Pulp and paper, Water and waste management

BALL VALVES

FLOATING BALL VALVES

Series BV BF/B8



3/8" - 10"
DN10 - DN250
Class 150-600
PN16-100
Connections RF, RTJ, BW
API 6D / ASME B16.34 /
ASME B16.10 / EN 558 /
ASME B16.5 / EN 1092-1 /
ASME B16.25 / EN 12627 /
API 598 / EN 12266-1

Features/Options:
- Metal or soft seated, bidirectional
- 2 pieces or 3 pieces body
- Full bore or reduced bore
- Solid or light ball
- Blow-out proof stem
- Anti-static design
- Body cavity pressure relief
- Drain and vent connections
- Injection sealing
- Operation by Lever or Worm Gear
- Top arrangement to ISO 5211 for actuator assembly
- Lock device, chainwheel
- Position indicator, limit switches
- Live load packing
- Fully welded construction
- Bypass line
- Jacketed body
- Undergorund application structure available
- Cryogenic design, vacuum service design
- NACE MR0175 design
- Fire safe design to API 6FA
- Special execution for outdoors/corrosive atmosphere, high temperature service, etc.

TRUNNION BALL VALVES

Series BV BT/B9

2" - 36"
DN50 - DN900
Class 150-2500
PN16-420
Connections RF, RTJ, BW
API 6D / ASME B16.34 /
ASME B16.10 / EN 558 /
ASME B16.5 / ASME B16.47 /
EN 1092-1 / ASME B16.25 /
EN 12627 / API 598 / EN 12266-1

Features/Options:
- Metal or soft seated, bidirectional
- 2 pieces or 3 pieces body
- Full bore or reduced bore
- Straight, 3 or 4 way valves
- Solid or light ball
- Blow-out proof stem
- Anti-static design
- Body cavity pressure relief
- Top or side entry
- Double block and bleed feature (DBB)
- Double piston effect function (DPE)
- Drain and vent connections
- Injection sealing
- Operation by Lever or Worm Gear
- Top arrangement to ISO 5211 for actuator assembly
- Lifting lugs and supporting feet
- Lock device, chainwheel
- Position indicator, limit switches
- Live load packing
- Fully welded construction
- Bypass line
- Jacketed body
- Undergorund application structure
- Cryogenic design, vacuum service design
- NACE MR0175 design
- Fire safe design to API 6FA
- Special execution for outdoors/corrosive atmosphere, high temperature service, etc.

Materials: Carbon steel, Low Carbon Steel, Alloy Steel, St. Steel & Exotic Materials, with wide variety of trims

Applications: Power, Oil&Gas, Process, Mining, Pharmaceutical, Chemical, Pulp and paper, Water and waste management

Dimensions in mm
(1) Upper and lower values for each size are the respective maximum and minimum dimensions.
(2) Average of socket wall thickness around periphery shall not be less than listed values. The minimum values are permitted in localized areas.

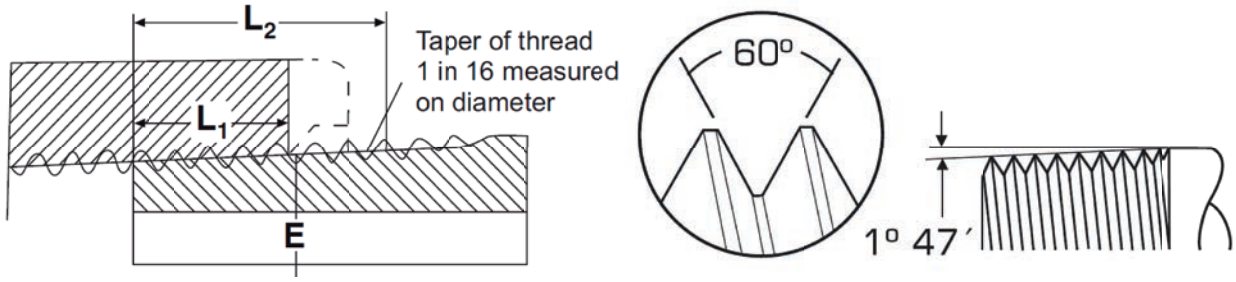
NPT Threaded Ends (NPT) acc. to ASME B1.20.1



E = Pitch diameter at hand-tight plane. This is also the pitch diameter at the gauge plane.
L_1 = Length of normal hand-tight engagement. This is also the L1 gauge length. (Longer thread engagement may be used in special applications, such as flanges for high pressure use. In such cases the pitch diameter, E, remains as specified and the diameter at the end of the pipe is proportionally smaller).
L_2 = Effective length of thread.
l = Truncation from point of thread triangle to flat (not shown in diagram). Minimum = 0.033P for all pitches. See table for maximum.

Nom. Pipe Size	No. of threads per inch	Pitch of thread P		Depth of thread h		Truncation, max. l		Pitch diameter at plane of hand-tight engagement E		Length from end of pipe to plane of hand-tight engagement L_1		Length of useful thread L_2		Length of vanish (or washout) thread L_2

Basic dimensions are given to four or five decimal places to eliminate errors when calculating gauge dimensions, they do not imply a greater degree of precisions than is normally obtainable.
Tolerances: When using L1 gauges to check threads, the thread is within permissible tolerance if the ring gauge face, or plug gauge notch, is +/- 1 turn from being flush with the end of the thread.
Metric dimensions, where shown, are calculated from the inch values and rounded.

Limits of use acc. to ASME B16.34-2013 and ASME B&PV Code / Pressure tests acc. to API 598

Limits of use / Main duties

BALL VALVES

Ball Valve Seat and Seal Material

Virgin PTFE
Virgin PTFE are basically used as ball valve seat material,with chemical compatibility to fill the widest possible range of service applications.

Color	Density (g/cm³)	Elongation (%)	Tensile Strength (MPa)	Continuous Working Temp. (ºC)
White	2,17	390	54	150

Reinforced PTFE
Reinforced PTFE,15% glass reinforced PTFE,chemical resistance is compatible to virgin PTFE but with better cycle life and greater P-T rating,recommended to used in Class150 and Class300 ball valve,limited use in Class600 ball valves with below NPS12.

Color	Density (g/cm³)	Hardness (Shore D)	Compressive Strength (MPa)	Continuous Working Temp. (ºC)
Off-white	2,1	76	68	180

Carbon Fiber Filled PTFE
Carbon Fiber Filled PTFE,25% Carbon Graphite with 75% TFE,retain virtually all the chemical compatibility properties of virgin PTFE but with better cycle life than PTFE, typically used for Class600&below trunnion mounted ball valve.

Color	Density (g/cm³)	Hardness (Shore D)	Compressive Strength (MPa)	Continuous Working Temp. (ºC)
Black	2,23	68	60	200

Nylon
Nylon primarily used in high pressure ball valves upto Class2500,it can be used in high pressure oil,air and other gas systems except oxygen,it is not recommended for water.

Color	Density (g/cm³)	Hardness (Shore D)	Water Absorption (%)	Compressive Strength (MPa)	Continuous Working Temp. (ºC)
White	1,2	65	3,5	100	90

Devlon
Devlon is improved version of Nylon,inherit basic properities of Nylon however with higher temperature limit,ideal seat material for high pressure ball valves.

Color	Density (g/cm³)	Hardness (Shore D)	Water Absorption (%)	Compressive Strength (MPa)	Continuous Working Temp. (ºC)
Bright Yellow	1,14	79	3	140	125

Values given just for reference. Please consult us for each particular applicaction

Information / restriction of technical rules need to be observed!
Installation, Operating and Maintenance Manual can be downloaded at www.comeval.es

The engineer, designing a system or a plant, is responsable for the selection of the correct valve
Product suitability must be verified, contact manufacturer for information

Limits of use / Main duties

BALL VALVES

Ball Valve Seat and Seal Material

PEEK
Polyetheretherketone, excellently suitable for high pressure and temperature service, meanwhile offer very good corrosion resistance, with stable sealing in COMEVAL made Class2500 ball valves.

Color	Density (g/cm³)	Hardness (Shore D)	Compressive Strength (MPa)	Continuous Working Temp. (ºC)
Sallow	1,29	85	118	260

PPL
Polyphenyene,recommended for use in medium high pressure and temperature floating ball valves, similar properities to PTFE, good abrasive resistance and higher deformation rating and density than PTFE.

Color	Density (g/cm³)	Hardness (Shore D)	Compressive Strength (MPa)	Continuous Working Temp. (ºC)
Chocolate Brown	2,4	65	40	200

Values given just for reference. Please consult us for each particular applicaction

Besides the soft seat ball valves, COMEVAL VALVE SYSTEMS accumulated pretty rich experiences in metal seat ball valves,all our metal seat ball valves with basic acceptance criteria of zero-leakage, successfully applied in very strict working conditions and known well for it's excellent performance stability.
Typical Metal Sealings:

- TCC-Tungsten Carbide Coating
- Nickle Base Alloy Spraying Welding like Inconel,Hastelloy,Monel,etc
- Cobalt Base Alloy Spraying Welding-Stellite

CAST PRODUCTS

The following graphs represent the Temperature / Pressure relation for all metal seated valves, strainers and other flow control products made out in the following pressure retaining shell materials:

- Carbon Steel A216 WCB
- Low Carbon Steel A352 LCB
- Alloy Steel A217 WC1, A217 WC6, A217 WC9, A217 C5, A217 C12
- Stainless Steel A351 CF8, A351 CF8M, A351 CF3, A351 CF3M
- And for Design Pressures up to 2500 Lbs.

All products with resilient seat or other components are subject to temperature restrictions governed by these resilient materials.

** See page 47 for notes*

Pressure / Temperature Chart according to *ASME B16.34* & *ASME B&PV Code*

CAST PRODUCTS

The following graphs represent the Temperature / Pressure relation for all metal seated valves, strainers and other flow control products made out in the following pressure retaining shell materials:

- Carbon Steel A216 WCB
- Low Carbon Steel A352 LCB
- Alloy Steel A217 WC1, A217 WC6, A217 WC9, A217 C5, A217 C12
- Stainless Steel A351 CF8, A351 CF8M, A351 CF3, A351 CF3M
- And for Design Pressures up to 2500 Lbs.

All products with resilient seat or other components are subject to temperature restrictions governed by these resilient materials.

(1) Not to be used over 345ºC.
(2) Not to be used over 425ºC.
(3) Not to be used over 455ºC.
(4) Not to be used over 595ºC.
(5) Use normalized and tempered material only.
(6) The deliberate addition of any alement not listed in ASTM A217, Table 1 is prohibited, except that calcium (Ca) and manganese (Mn) may be added for deoxidation.
(7) At temperatures above 538ºC, use only when the carbon content is 0,04% or higher.
(8) Permissible, but not recommended for prolonged use above 595ºC.
(9) Upon prolonged exposure to temperatures above 425ºC, the carbide phase of steel may be converted to graphite. Permissible, but not recommended for prolonged usage above 425ºC.
(10) Upon prolonged exposure to temperatures above 470ºC, the carbide phase of steel may be converted to graphite. Permissible, but not recommended for prolonged usage above 470ºC.
(11) Only killed steel shall be used above 455ºC.

SERIES 80/81 ANSI RANGE

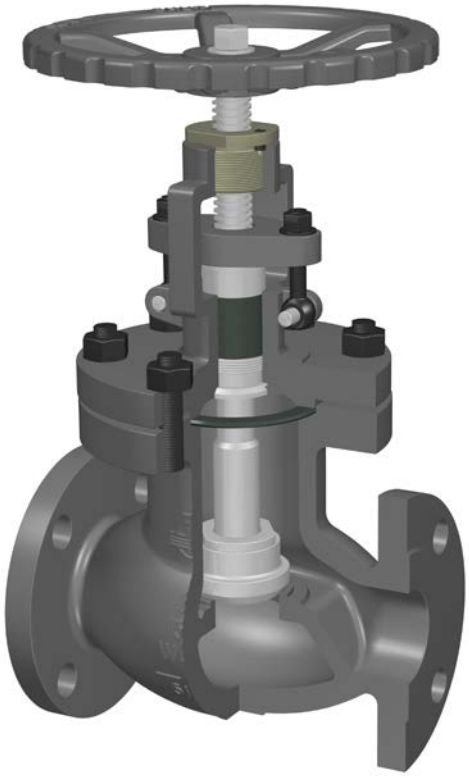
Series 80 Globe Valves are linear motion valves devised for stopping the flow of the service fluid when necessary. They are bolted bonnet, outside screw and yoke, rising handwheel, being the closure element a disc seating against a precisely machined seat thus achieving the positive closure. The atmospheric sealing is achieved by flexible graphite rings. The flow comes upwards underneath the seat, being an unidirectional valve. Weir body leads to higher pressure drop compared to gate valves but operation is quicker and this feature allows to use the valve as regulating valve when arranged with throttling plug. Valves are of easy and safe operation being widely used in power, chemical and oil industry. The range is also comprehensive o a wide offer of different versions and options. The standard operation is achieved by handwheel or gear, depending on valve size and working pressure. Valves can also be arranged for automation with different kinds of actuators.

Outside screw and yoke

Precise machining of components for optimal performance

Back Seat feature

Seat surface can be hardened to increase wear resistance



Ergonomic rising handwheel

Marking for identification and full traceability purpose

Great versatility in end connections, materials and configurations

Main Features / Reference Standards

Design: BS 1873 / ASME B16.34
Pressure Rating: 150/300/600/900/1500/2500#
Face to face length: ASME B16.10
Valve end connections: Flanged RF or RTJ to ASME B16.5
Welded BW to ASME B16.25
Marking: MSS SP-25
Inspections & Tests: API 598
Unidirectional design. See the arrow on the body for normal flow direction
Primer painted grey color similar to RAL 7037 for protection during storage and transport (carbon steel body/bonnet)
Product compliant with Directive 2014/68/EU on Pressure Equipment (PED) and Machinery Directive 2006/42/EC for European Union territory

Main Duties / Limits of use

Fluids compatible with materials of construction. Questions referring to chemical resistance, please consult us
Pressure / Temperature Rating to ASME B16.34. See section “Engineering & Performance Data”
For products compliant with Directive 2014/68/EU, observe also limits acc. to Annex II tables 6 & 8 (gases & liquids group 1*) and tables 7 & 9 (gases & liquids group 2*) up to category III
**Classification of fluids (group 1 or 2) acc. to Directive 2014/68/EU, Article 13*

Options

Different body materials and trim combinations, different valve connections, angle pattern, Y-pattern, regulating plug, compliance with NACE MR0175, extended bonnet, bellow seal, pressure seal, welded bonnet, lantern ring with double packing, live loaded packing, chained hand wheel, manual gear, pneumatic, electric or hydraulic actuation, limit switches, execution for aggressive atmosphere, etc. Please consult us

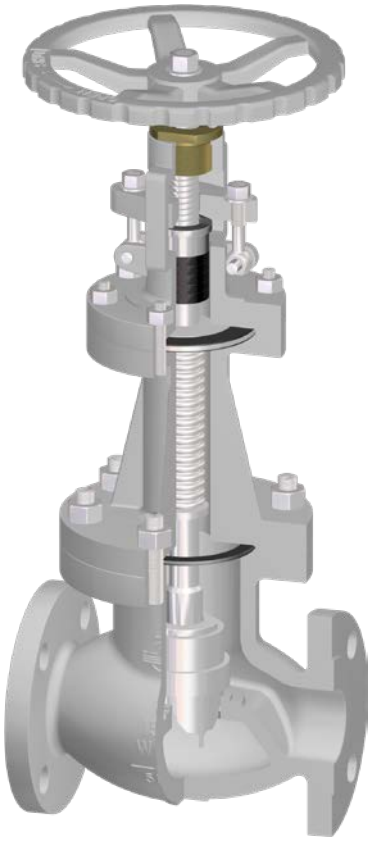
SERIES 84 ANSI RANGE

Series 84 Globe Valves are linear motion valves devised for stopping the flow of the service fluid when necessary. They are bolted bonnet, outside screw and yoke, rising handwheel, being the closure element a disc seating against a precisely machined seat thus achieving the positive closure. The atmospheric sealing is achieved by flexible graphite rings. The flow comes upwards underneath the seat, being an unidirectional valve. Weir body leads to higher pressure drop compared to gate valves but operation is quicker and this feature allows to use the valve as regulating valve when arranged with throttling plug. Valves are of easy and safe operation being widely used in power, chemical and oil industry. The range is also comprehensive o a wide offer of different versions and options. The standard operation is achieved by handwheel or gear, depending on valve size and working pressure. Valves can also be arranged for automation with different kinds of actuators.

- Outside screw and yoke
- Precise machining of components for optimal performance
- Seat surface can be hardened to increase wear resistance
- Valve disc guide feature



- Ergonomic rising handwheel
- Marking for identification and full traceability purpose
- Great versatility in end connections, materials and configurations

Main Features / Reference Standards

Design: BS 1873 / ASME B16.34
Pressure Rating: 150/300/600#
Face to face length: ASME B16.10
Valve end connections: Flanged RF or RTJ to ASME B16.5
Welded BW to ASME B16.25
Marking: MSS SP-25
Inspections & Tests: API 598
Unidirectional design. See the arrow on the body for normal flow direction
Primer painted grey color similar to RAL 7037 for protection during storage and transport (carbon steel body/bonnet)
Product compliant with Directive 2014/68/EU on Pressure Equipment (PED) and Machinery Directive 2006/42/EC for European Union territory

Main Duties / Limits of use

Fluids compatible with materials of construction. Questions referring to chemical resistance, please consult us
Pressure / Temperature Rating to ASME B16.34. See section “Engineering & Performance Data”
For products compliant with Directive 2014/68/EU, observe also limits acc. to Annex II tables 6 & 8 (gases & liquids group 1*) and tables 7 & 9 (gases & liquids group 2*) up to category III
**Classification of fluids (group 1 or 2) acc. to Directive 2014/68/EU, Article 13*

Options

Different body materials and trim combinations, different valve connections, angle pattern, Y-pattern, regulating plug, compliance with NACE MR0175, extended bonnet, bellow seal, pressure seal, welded bonnet, lantern ring with double packing, live loaded packing, chained hand wheel, manual gear, pneumatic, electric or hydraulic actuation, limit switches, execution for aggressive atmosphere, etc. Please consult us

11	Packing		Flexible Graphite(Ta-Luft certified available)	
12	Eyebolt Pin		AISI 1025	
13	Gland Eyebolt (1)		ASTM A193 B7	
14	Gland Nut (1)		ASTM A194 2H	
15	Packing Gland		ASTM A182 F6a	
16	Gland Flange		ASTM A216 WCB	
17	Stem Nut		ASTM A439 D2	
18	Retaining Nut		Carbon Steel/ Acero Carbono	
19	Handwheel		Carbon Steel/ Acero Carbono	
22	Grease Fitting		Brass	
25	Gear		Assembly	
27	Bellows Plate		A276 304	
28	Bellows		SS316L(SS316Ti/Inconel/Incoloy/Hastelloy available)	
29	Bellows Plate		ASTM A276 304	
30	Gasket		SS304+Graphite	
31	Positioner		Carbon Steel/ Acero Carbono	
32	Positioner Pin		AISI 1025	
33	Yoke		ASTM A216 WCB	
34	Yoke Nut (1)		ASTM A194 2H	
35	Yoke Bolt (1)		ASTM A193 B7	
36	Cap		Carbon Steel/ Acero Carbono	
37	Disc Guide		Carbon Steel/ Acero Carbono	
38	Pilot plug	ASTM A105+13Cr	ASTM A105+HF	ASTM A105+13Cr

(1) Bolting material for NACE MR0175 compliance available (i.e. B7M / 2HM for WCB bodies)

Information / restriction of technical rules need to be observed!
Installation, Operating and Maintenance Manual can be downloaded at www.comeval.es

The engineer, designing a system or a plant, is responsable for the selection of the correct valve
Product suitability must be verified, contact manufacturer for information

Product suitability must be verified, contact manufacturer for information

SERIES 90/91 ANSI RANGE

Series 90 Gate Valves are linear motion valves devised for stopping the flow of the service fluid when necessary, not being suitable for regulating purpose. They are bolted bonnet, outside screw and yoke, rising stem, bidirectional, with metal sealing and full bore. The atmospheric sealing is achieved by flexible graphite rings. The two slightly sloped seats favor a tight shut off, being largely used in the power, chemical and oil industry sectors. The range is also comprehensive of a wide offer of different versions and options. The standard operation is achieved by handwheel or gear, depending on valve size and working pressure. Valves can also be arranged for automation with different kinds of actuators.

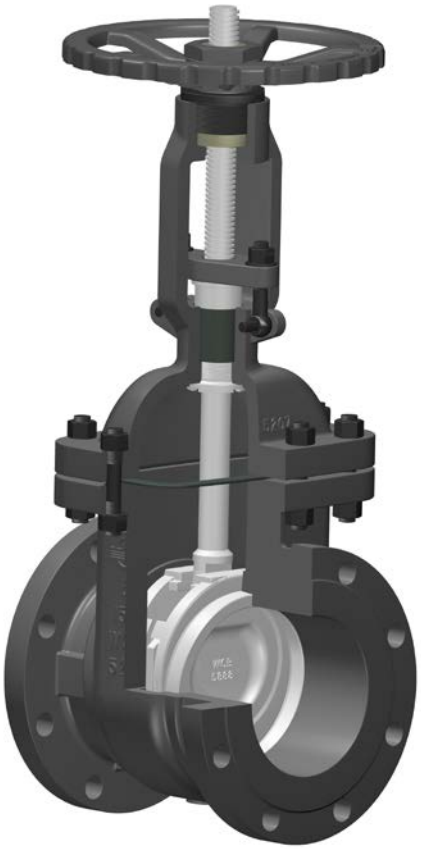
Precise machining of components for optimal performance

Outside screw and yoke, rising stem

Back Seat feature

Seat surface can be hardened to increase wear resistance

Flexible Wedge, favours the closure even at low pressures



Ergonomic non-rising handwheel

Marking for identification and full traceability purpose

Great versatility in end connections, materials and configurations

Sloped valve seats, vertical shut off, flow assists closure

Full bore, mínimum pressure drop

Main Features / Reference Standards

Design: API 600 or API 6D
Pressure Rating: 150/300/600/900/1500/2500#
Face to face length: ASME B16.10
Valve end connections: Flanged RF or RTJ to ASME B16.5 (*size ≤ 24"*) / ASME B16.47 (*size > 24"*)
Welded BW to ASME B16.25
Marking: MSS SP-25
Inspections & Tests: API 598
Bidirectional design
Primer painted grey color similar to RAL 7037 for protection during storage and transport (carbon steel body/bonnet)
Product compliant with Directive 2014/68/EU on Pressure Equipment (PED) and Machinery Directive 2006/42/EC for European Union territory

Main Duties / Limits of use

Fluids compatible with materials of construction. Questions referring to chemical resistance, please consult us
Pressure / Temperature Rating to ASME B16.34. See section "Engineering & Performance Data"
For products compliant with Directive 2014/68/EU, observe also limits acc. to Annex II tables 6 & 8 (gases & liquids group 1*) and tables 7 & 9 (gases & liquids group 2*) up to category III
**Classification of fluids (group 1 or 2) acc. to Directive 2014/68/EU, Article 13*

Options

Different body materials and trim combinations, different valve connections, compliance with NACE MR0175, extended bonnet, bellow seal, pressure seal, welded bonnet, lantern ring with double packing, live loaded packing, chained hand wheel, manual gear, pneumatic, electric or hydraulic actuation, limit switches, execution for aggressive atmosphere, etc. Please consult us
Design acc. to API 603 fo st. steel gate valves on request.

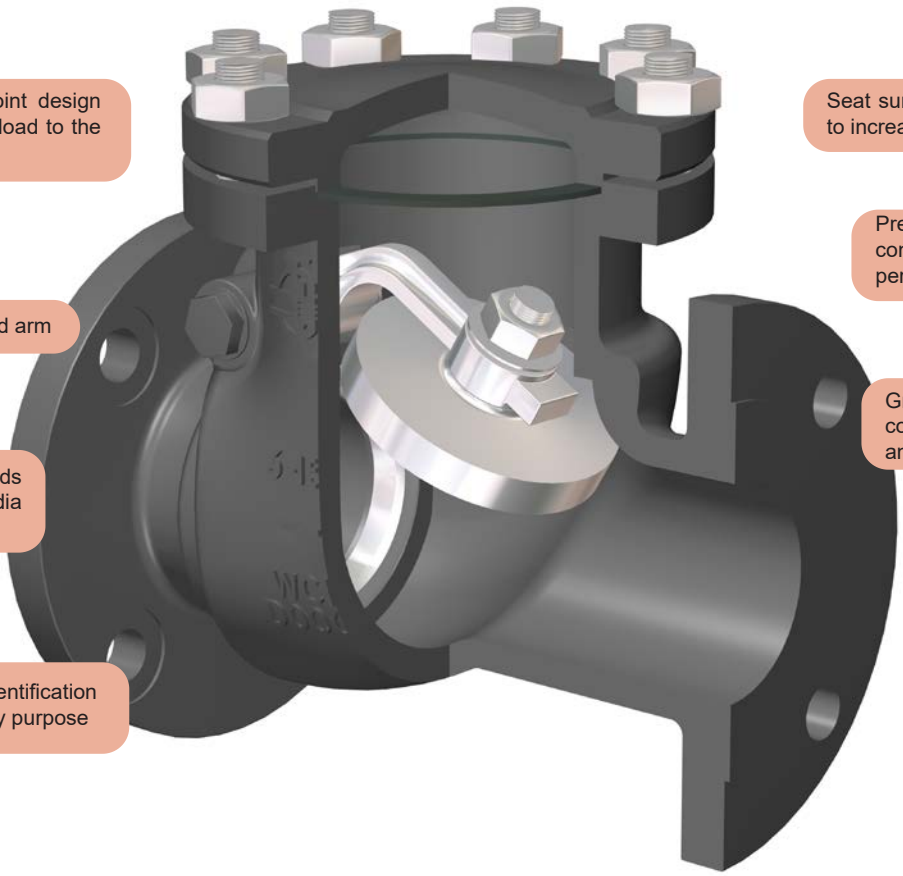
Gate Valve with AUMA Actuator

SERIES 3S/31 ANSI RANGE

Check Valves are self-acting valves used for preventing the reverse of flow in a piping system. Series 3S are Swing Check Valves that operate by means of its articulated disc. They are featured by its rugged and simple design and easy maintenance.



- Body to cover joint design to apply uniform load to the gasket
- Disc hold by bolted arm
- Vertical seat, avoids trapping of media particles
- Marking for identification and full traceability purpose
- Seat surface can be hardened to increase wear resistance
- Precise machining of components for optimal performance
- Great versatility in end connections, materials and configurations

Main Features / Reference Standards

Design: API 6D / BS 1868
Pressure Rating: 150/300/600/900/1500/2500#
Face to face length: ASME B16.10
Valve end connections: Flanged RF or RTJ to ASME B16.5 (*size ≤ 24"*) / ASME B16.47 (*size > 24"*)
Welded BW to ASME B16.25
Marking: MSS SP-25
Inspections & Tests: API 598
Primer painted grey color similar to RAL 7037 for protection during storage and transport (carbon steel body/bonnet)
Product compliant with Directive 2014/68/EU on Pressure Equipment (PED)
for European Union territory

Main Duties / Limits of use

Fluids compatible with materials of construction. Questions referring to chemical resistance, please consult us
Pressure / Temperature Rating to ASME B16.34. See section "Engineering & Performance Data"
For products compliant with Directive 2014/68/EU, observe also limits acc. to Annex II tables 6 & 8 (gases & liquids group 1*) and tables 7 & 9 (gases & liquids group 2*) up to category III
**Classification of fluids (group 1 or 2) acc. to Directive 2014/68/EU, Article 13*

Options

Diverse materials of construction and trim combinations, special designs, execution for aggressive atmosphere, compliance with NACE MR0175, etc.Please consult us

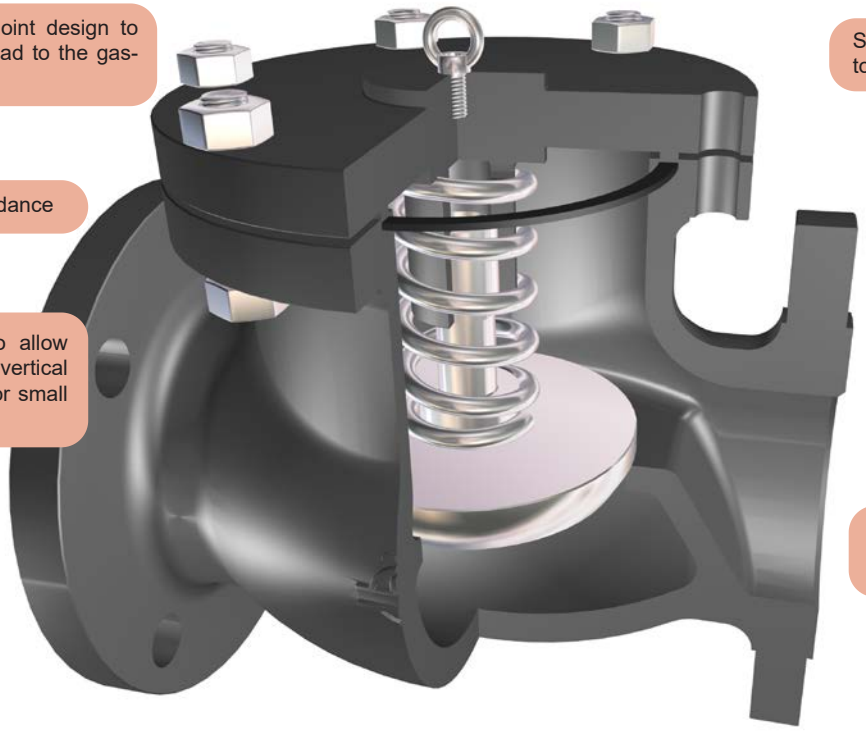
SERIES 3P ANSI RANGE

Check Valves are self-acting valves used for preventing the reverse of flow in a piping system. Series 3P are Piston Check Valves are provided with a guided piston which can be loaded by a spring and closes the disc against a horizontal valve seat. Piston Check Valves provide a larger pressure drop in the pipe line, this design permits a faster closure reaction and more tightness.

Body to cover joint design to apply uniform load to the gasket

Precise plug guidance

Spring loaded to allow installation on vertical lines (standard for small sizes)



Seat surface can be hardened to increase wear resistance

Precise machining of components for optimal performance

Great versatility in end connections, materials and configurations

Marking for identification and full traceability purpose

Main Features / Reference Standards

Design: ASME B16.34 / BS 1868
Pressure Rating: 150/300/600/900/1500/2500#
Face to face length: ASME B16.10
Valve end connections: Flanged RF or RTJ to ASME B16.5
Welded BW to ASME B16.25
Marking: MSS SP-25
Inspections & Tests: API 598
Primer painted grey color similar to RAL 7037 for protection during storage and transport (carbon steel body/bonnet)
Product compliant with Directive 2014/68/EU on Pressure Equipment (PED)
for European Union territory

Main Duties / Limits of use

Fluids compatible with materials of construction. Questions referring to chemical resistance, please consult us
Pressure / Temperature Rating to ASME B16.34. See section “Engineering & Performance Data”
For products compliant with Directive 2014/68/EU, observe also limits acc. to Annex II tables 6 & 8 (gases & liquids group 1*) and tables 7 & 9 (gases & liquids group 2*) up to category III
**Classification of fluids (group 1 or 2) acc. to Directive 2014/68/EU, Article 13*

Options

Diverse materials of construction and trim combinations, with or without spring, angle pattern, Y pattern, execution for turbulent flow or unstable condition, execution for aggressive atmosphere, compliance with NACE MR0175, etc. Please consult us

The engineer, designing a system or a plant, is responsable for the selection of the correct valve
Product suitability must be verified, contact manufacturer for information

SERIES F0 ANSI RANGE

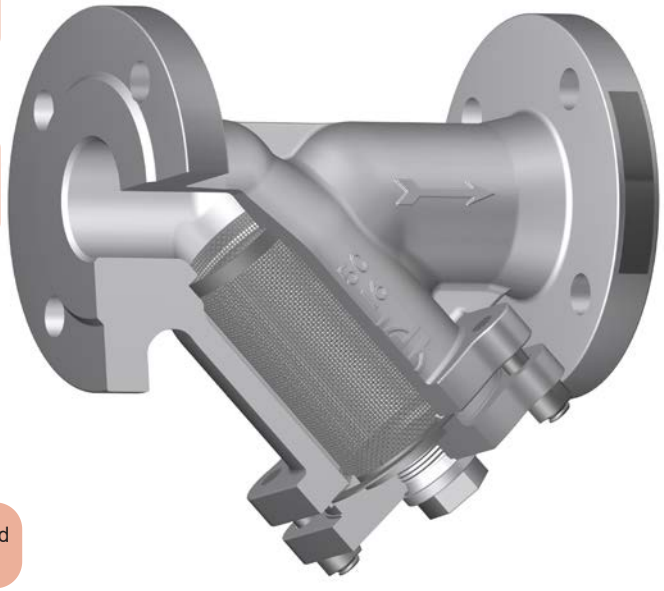
Y-Strainers are devices for mechanically removing solids from flowing media by means of a wired mesh or perforated basket, replaceable in line. They combine a rugged and compact design for indoors installation in industrial plants, building industry, etc.

St. steel screen, made out of high resistance wire, rugged and braided type or perforated basket

Precise machined seat slot, to accomodate the screen and avoid dirt to by-pass the strainer

Reinforced Graphite gasket, with. st. steel reinforcement

Standard gasket free threaded blow-off connection



Marking for identification and full traceability purpose

Great versatility in end connections, materials and configurations

Removable bolting cover, to ease maintenance

Main Features / Reference Standards

Design: ASME B16.34
Pressure Rating: 150/300/600#
Face to face length: ASME B16.10 and manufacturer standard
Valve end connections: Flanged RF or RTJ to ASME B16.5
Welded BW to ASME B16.25
Standard mesh width: 1 mm (DN50); 1,25 mm (DN80); 1,6 mm (DN100-DN300)
Marking: MSS SP-25
Inspections & Tests: API 598
Primer painted grey color similar to RAL 7037 for protection during storage and transport (carbon steel body/bonnet)
Product compliant with Directive 2014/68/EU on Pressure Equipment (PED)
for European Union territory

Main Duties / Limits of use

Fluids compatible with materials of construction. Questions referring to chemical resistance, please consult us
Pressure / Temperature Rating to ASME B16.34. See section “Engineering & Performance Data”
For products compliant with Directive 2014/68/EU, observe also limits acc. to Annex II tables 6 & 8 (gases & liquids group 1*) and tables 7 & 9 (gases & liquids group 2*) up to category III
**Classification of fluids (group 1 or 2) acc. to Directive 2014/68/EU, Article 13*

Options

Diverse materials of construction and trim combinations, special designs, pressure seal cover for high pressure, perforated or wire mesh, other mesh width, special mesh for vacuum service or in suction side of pumps, execution for aggressive atmosphere, compliance with NACE MR0175, etc. Please consult us

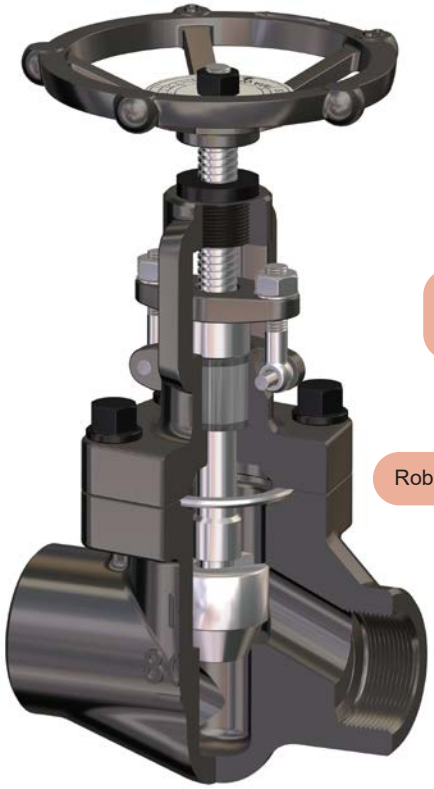
SERIES 89 ANSI RANGE

Series 89 Forged Globe Valves are linear motion valves devised for stopping the flow of the service fluid when necessary. They are of robust and compact design, bolted bonnet, outside screw and yoke, conventional port and rising handwheel, being the closure element a disc seating against a precisely machined seat thus achieving the positive closure. The atmospheric sealing is achieved by flexible graphite rings. The flow comes upwards underneath the seat, being unidirectional. Their shape leads to higher pressure drop compared to gate valves but operation is quicker and this feature allows to use the valve as regulating valve when arranged with throttling plug. Valves are of easy and safe operation being widely used in power, chemical and oil industry. The range is also comprehensive of a wide offer of different versions and options. The standard operation is achieved by handwheel, and they can also be arranged for automation with different kinds of actuators.

- Outside screw and yoke
- Precise machining of components for optimal performance
- Back Seat feature
- Seat surface can be hardened to increase wear resistance



- Ergonomic rising handwheel
- Marking for identification and full traceability purpose
- Robust and compact construction
- Great versatility in end connections, materials and configurations

Main Features / Reference Standards

Design: API 602
Pressure Rating: 800/1500/2500#
Face to face length: Manufacturer standard
Valve end connections: Threaded NPT to ASME B1.20.1 / BSP to ISO 228-1 / BSPT to ISO 7-1
Welded SW to ASME B16.11
Marking: MSS SP-25
Inspections & Tests: API 598
Unidirectional design. See the arrow on the body for normal flow direction
Zinc phosphated surface protection for forged steel valves
Product compliant with Directive 2014/68/EU on Pressure Equipment (PED) and Machinery Directive 2006/42/EC for European Union territory

Main Duties / Limits of use

Fluids compatible with materials of construction. Questions referring to chemical resistance, please consult us
Pressure / Temperature Rating to ASME B16.34. See section “Engineering & Performance Data”
For products compliant with Directive 2014/68/EU, observe also limits acc. to Annex II tables 6 & 8 (gases & liquids group 1*) and tables 7 & 9 (gases & liquids group 2*) up to category III
**Classification of fluids (group 1 or 2) acc. to Directive 2014/68/EU, Article 13*

Options

Diverse body materials and trim combinations, different valve connections, Y-Pattern, regulating plug, extended bonnet, bellow seal, pressure seal, welded bonnet, different actuation, limit switches... Please consult us

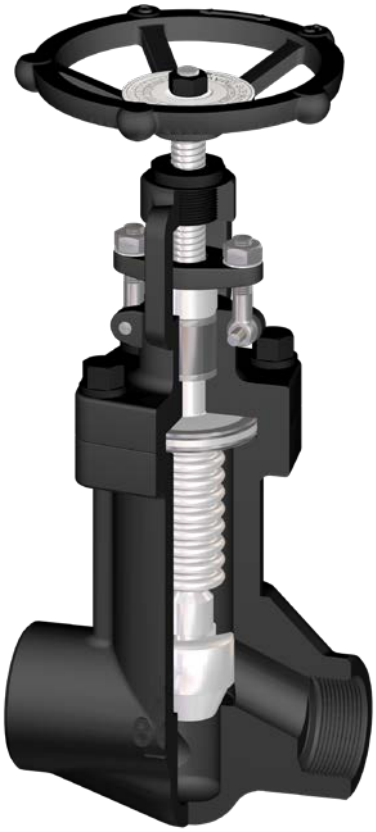
SERIES 88 ANSI RANGE

Series 88 Forged Globe Valves with bellows are linear motion valves devised for stopping the flow of the service fluid when necessary. They are of robust and compact design, bolted bonnet, outside screw and yoke, conventional port and rising handwheel, being the closure element a disc seating against a precisely machined seat thus achieving the positive closure. The atmospheric sealing is achieved by flexible graphite rings and moreover by a full tightness bellow. The flow comes upwards underneath the seat, being unidirectional. Their shape leads to higher pressure drop compared to gate valves but operation is quicker and this feature allows to use the valve as regulating valve when arranged with throttling plug. Valves are of easy and safe operation being widely used in power, chemical and oil industry. The range is also comprehensive of a wide offer of different versions and options. The standard operation is achieved by handwheel, and they can also be arranged for automation with different kinds of actuators.

- Outside screw and yoke
- Precise machining of components for optimal performance
- Bellows feature for a full tightness
- Seat surface can be hardened to increase wear resistance



- Ergonomic rising handwheel
- Marking for identification and full traceability purpose
- Back Seat feature
- Robust and compact construction
- Great versatility in end connections, materials and configurations

Main Features / Reference Standards

Design: API 602
Pressure Rating: Class 800/1500#
Face to face length: Manufacturer standard
Valve end connections: Threaded NPT to ASME B1.20.1 / BSP to ISO 228-1 / BSPT to ISO 7-1
Welded SW to ASME B16.11
Marking: MSS SP-117
Inspections & Tests: API 598
Unidirectional design. See the arrow on the body for normal flow direction
Zinc phosphated surface protection for forged steel valves
Product compliant with Directive 2014/68/EU on Pressure Equipment (PED) and Machinery Directive 2006/42/EC for European Union territory

Main Duties / Limits of use

Fluids compatible with materials of construction. Questions referring to chemical resistance, please consult us
Pressure / Temperature Rating to ASME B16.34. See section “Engineering & Performance Data”
For products compliant with Directive 2014/68/EU, observe also limits acc. to Annex II tables 6 & 8 (gases & liquids group 1*) and tables 7 & 9 (gases & liquids group 2*) up to category III
**Classification of fluids (group 1 or 2) acc. to Directive 2014/68/EU, Article 13*

Options

Diverse body materials and trim combinations, different valve connections, Y-Pattern, regulating plug, extended bonnet, bellows seal, pressure seal, welded bonnet, different actuation, limit switches... Please consult us

SERIES 99/96 ANSI RANGE

Series 99 Forged Gate Valves are linear motion valves devised for stopping the flow of the service fluid when necessary, not being suitable for regulating purpose. They are of robust and compact design, conventional port, bolted bonnet, outside screw and yoke, rising stem and bidirectional. The atmospheric sealing is achieved by flexible graphite rings. The two vertical slightly sloped seats with solid wedge finely machined favor a tight shut off, being largely used in the power, chemical and oil industry sectors. The range is also comprehensive of a wide offer of different versions and options. The standard operation is achieved by handwheel, and they can also be arranged for automation with different kinds of actuators.

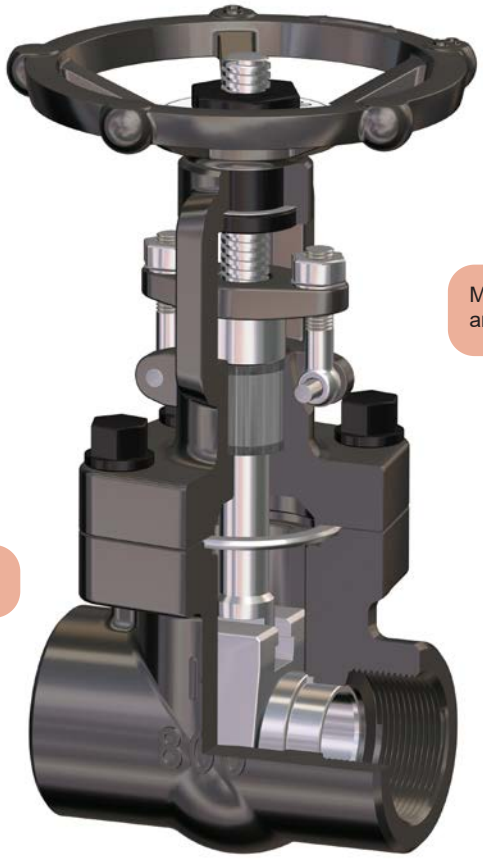
Precise machining of components for optimal performance

Outside screw and yoke rising stem

Back Seat feature

Seat surface can be hardened to increase wear resistance

Solid Wedge



Ergonomic non-rising handwheel

Marking for identification and full traceability purpose

Robust and compact construction

Great versatility in end connections, materials and configurations

Main Features / Reference Standards

Design: API 602
Pressure Rating: 800/1500/2500#
Face to face length: Manufacturer standard
Valve end connections: Threaded NPT to ASME B1.20.1 / BSP to ISO 228-1 / BSPT to ISO 7-1
Welded SW to ASME B16.11
Marking: MSS SP-25
Inspections & Tests: API 598
Bidirectional design
Zinc phosphated surface protection for forged steel valves
Product compliant with Directive 2014/68/EU on Pressure Equipment (PED) and Machinery Directive 2006/42/EC for European Union territory

Main Duties / Limits of use

Fluids compatible with materials of construction. Questions referring to chemical resistance, please consult us
Pressure / Temperature Rating to ASME B16.34. See section “Engineering & Performance Data”

SERIES 39/38 ANSI RANGE

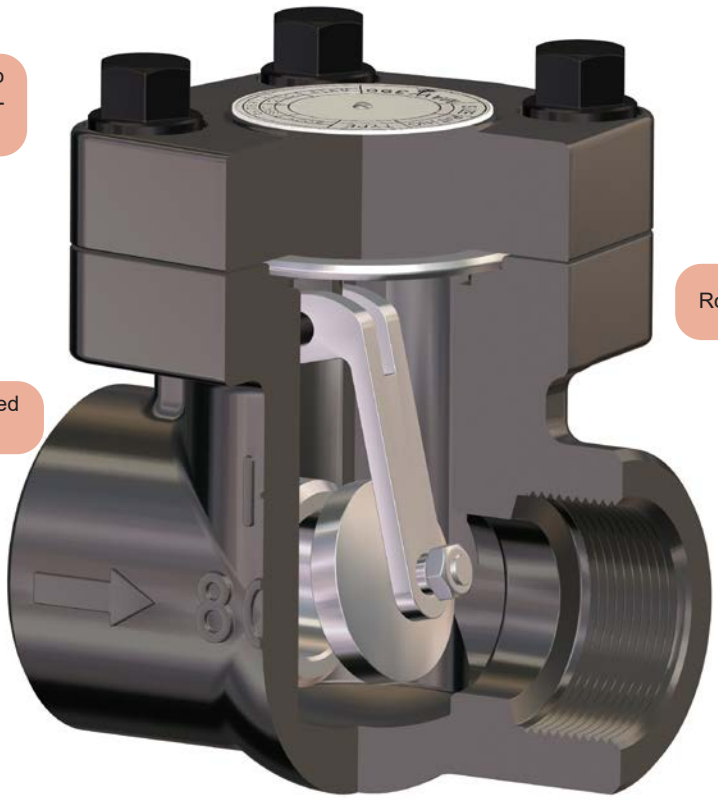
Check Valves are self-acting valves used for preventing the reverse of flow in a piping system. Series 39 are Forged Swing Check Valves that operate by means of its articulated disc. They are featured by its rugged and compact design and easy maintenance.

Body to cover joint design to apply uniform load to the gasket

Disc hold by bolted arm

Seat surface can be hardened to increase wear resistance

Vertical seat, avoids trapping of media particles



Marking for identification and full traceability purpose

Robust and compact construction

Precise machining of components for optimal performance

Great versatility in end connections, materials and configurations

Main Features / Reference Standards

Design: API 602
Pressure Rating: 800/1500/2500#
Face to face length: Manufacturer standard
Valve end connections: Threaded NPT to ASME B1.20.1 / BSP to ISO 228-1 / BSPT to ISO 7-1
Welded SW to ASME B16.11
Marking: MSS SP-25
Inspections & Tests: API 598
Zinc phosphated surface protection for forged steel valves
Product compliant with Directive 2014/68/EU on Pressure Equipment (PED)
for European Union territory

Main Duties / Limits of use

Fluids compatible with materials of construction. Questions referring to chemical resistance, please consult us
Pressure / Temperature Rating to ASME B16.34. See section “Engineering & Performance Data”
For products compliant with Directive 2014/68/EU, observe also limits acc. to Annex II tables 6 & 8 (gases & liquids group 1*) and tables 7 & 9 (gases & liquids group 2*) up to category III
**Classification of fluids (group 1 or 2) acc. to Directive 2014/68/EU, Article 13*

Options

Diverse body materials and trim combinations, different valve connections, pressure seal, welded bonnet... Please consult us

SERIES 35/34 ANSI RANGE

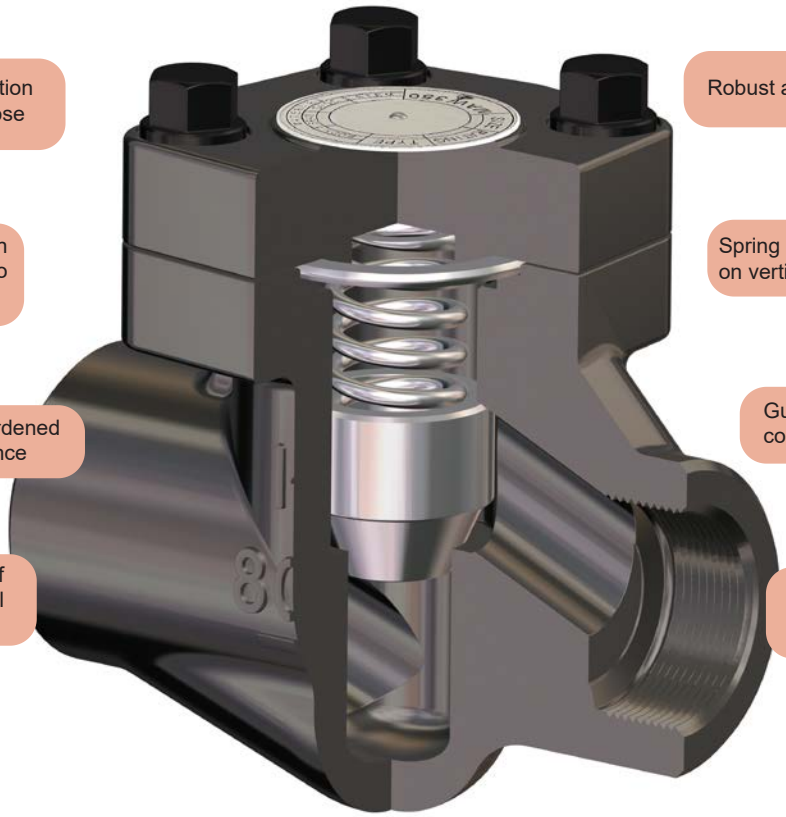
Check Valves are self-acting valves used for preventing the reverse of flow in a piping system. Forged Piston Check Valves Series 35 are featured by its rugged and compact design and easy maintenance. They are provided with a guided piston which is loaded by a spring and the disc closes against a horizontal valve seat. Compared with other check valves, they permit a faster closure reaction and more tightness, with higher pressure drop.

Marking for identification and full traceability purpose

Body to cover joint design to apply a uniform load to the gasket

Seat surface can be hardened to increase wear resistance

Precise machining of components for optimal performance



Robust and compact construction

Spring loaded to allow installation on vertical lines

Guided piston to assure a correct seal

Great versatility in end connections, materials and configurations

Main Features / Reference Standards

Design: API 602
Pressure Rating: 800/1500/2500#
Face to face length: Manufacturer standard
Valve end connections: Threaded NPT to ASME B1.20.1 / BSP to ISO 228-1 / BSPT to ISO 7-1
Welded SW to ASME B16.11
Marking: MSS SP-25
Inspections & Tests: API 598
Zinc phosphated surface protection for forged steel valves
Product compliant with Directive 2014/68/EU on Pressure Equipment (PED)
for European Union territory

Main Duties / Limits of use

Fluids compatible with materials of construction. Questions referring to chemical resistance, please consult us
Pressure / Temperature Rating to ASME B16.34. See section “Engineering & Performance Data”
For products compliant with Directive 2014/68/EU, observe also limits acc. to Annex II tables 6 & 8 (gases & liquids group 1*) and tables 7 & 9 (gases & liquids group 2*) up to category III
**Classification of fluids (group 1 or 2) acc. to Directive 2014/68/EU, Article 13*

Options

Diverse body materials and trim combinations, different valve connections, pressure seal, welded bonnet... Please consult us

CE

SERIES F9 ANSI RANGE

Y-Strainers are devices for mechanically removing solids from flowing media by means of a wired mesh or perforated basket, replaceable in line. They combine a rugged and compact design for indoors installation in industrial plants, building industry, etc.

Great versatility in end connections, materials and configurations

Marking for identification and full traceability purpose

St. steel screen, made out of high resistance wire, rugged and braided type or perforated basket

Precise machined seat slot, to accomodate the screen and avoid dirt to by-pass the strainer

Reinforced Graphite gasket, with. st. steel reinforcement

Standard gasket free threaded blow-off connection

Removable bolting cover, to ease maintenance

Robust and compact construction

Main Features / Reference Standards

Design: BS 5352
Pressure Rating: 800/1500#
Face to face length: Manufacturer standard
Valve end connections: Threaded NPT to ASME B1.20.1 / BSP to ISO 228-1 / BSPT to ISO 7-1
Welded SW to ASME B16.11
Marking: MSS SP-25
Inspections & Tests: API 598
Zinc phosphated surface protection for forged steel valves
Product compliant with Directive 2014/68/EU on Pressure Equipment (PED)
for European Union territory

Main Duties / Limits of use

Product suitability must be verified, contact manufacturer for information

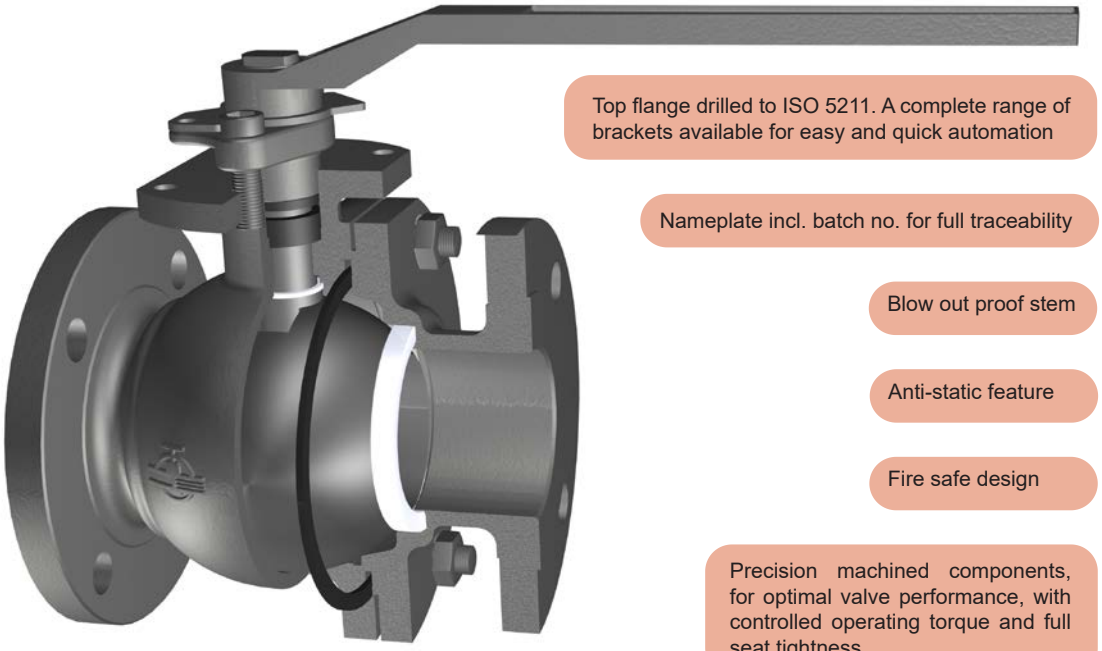
SERIES BV BF-B8 ANSI RANGE

Series BF are floating type, quick closing 90º rotary ball valves, bidirectional, with tightness achieved by friction of the ball blind ends to the seats, devised for stopping the flow of the service fluid when necessary and not being suitable for regulation purposes. Valve closes by turning the hand lever clockwise. They have a robust construction to offer reliable performance in standard services.

Floating ball, full bore, side entry, split body design, with integral flanges



Top flange drilled to ISO 5211. A complete range of brackets available for easy and quick automation

Nameplate incl. batch no. for full traceability

Blow out proof stem

Anti-static feature

Fire safe design

Precision machined components, for optimal valve performance, with controlled operating torque and full seat tightness

Main Features / Reference Standards

Design: API 6D
Pressure Rating: 150/300/600#
Face to face length: API 6D
Valve end connections: Flanged RF or RTJ to ASME B16.5
Welded BW to ASME B16.25
Fire safe design: API 6FA
Bidirectional design
Marking: MSS SP-25
Inspections & Tests: API 598
Primer painted grey color similar to RAL 7037 for protection during storage and transport (carbon steel body/bonnet)
Product compliant with Directive 2014/68/EU on Pressure Equipment (PED) and Machinery Directive 2006/42/EC for European Union territory

Main Duties / Limits of use

Fluids compatible with materials of construction. Questions referring to chemical resistance, please consult us
Pressure / Temperature Rating to ASME B16.34. See section “Engineering & Performance Data”
For products compliant with Directive 2014/68/EU, observe also limits acc. to Annex II tables 6 & 8 (gases & liquids group 1*) and tables 7 & 9 (gases & liquids group 2*) up to category III
**Classification of fluids (group 1 or 2) acc. to Directive 2014/68/EU, Article 13*

Options

Different material combinations, different valve connections, worm gear, actuators, limit switches, cryogenic design, jacketed body, execution for aggressive atmosphere, compliance with NACE MR0175, etc. Please consult us

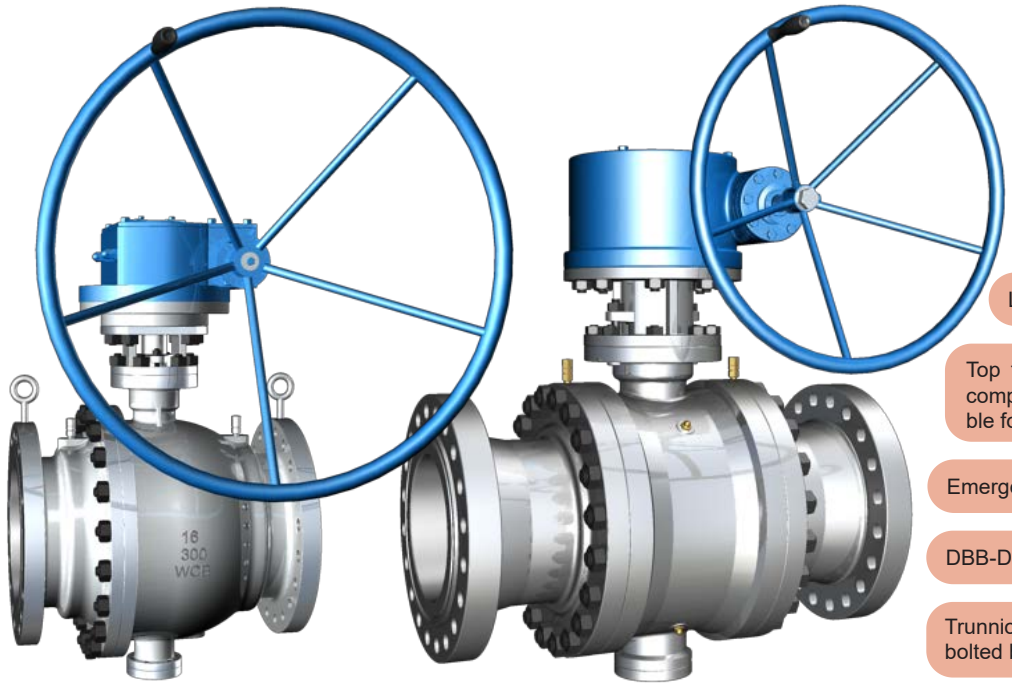
SERIES BV BT ANSI RANGE

Series BT are trunnion type, featured by the upper and lower ball guidance, quick closing 90º rotary ball valves, bidirectional, with tightness achieved by friction of the ball blind ends to the seats, devised for stopping the flow of the service fluid when necessary and not being suitable for regulation purposes. Valves can be operated by manual gear by handwheel (valve closes by turning the hand lever clockwise) or a choice of quarter turn electric, pneumatic or hydraulic actuators. They have a robust construction to offer reliable performance in standard services.



- Fire safe design
- Anti-static feature
- Blow out proof stem
- Self-relieving seat
- Lifting lugs and supporting feet
- Top flange drilled to ISO 5211. A complete range of brackets available for easy and quick automation
- Emergency Sealant Injection System
- DBB-Double bleed and block function
- Trunnion ball, full bore, side entry, split bolted body (two-pieces,three-pieces)
- Nameplate incl. batch no. for full traceability

Main Features / Reference Standards

Design: API 6D
Pressure Rating: 150/300/600/900/1500/2500#
Face to face length: API 6D
Valve end connections: Flanged RF or RTJ to ASME B16.5 (*size ≤ 24"*) / ASME B16.47 (*size > 24"*)
Welded BW to ASME B16.25
Fire safe design: API 6FA
Bidirectional design
Marking: MSS SP-25
Inspections & Tests: API 598
Primer painted grey color similar to RAL 7037 for protection during storage and transport (carbon steel body/bonnet)
Product compliant with Directive 2014/68/EU on Pressure Equipment (PED) and Machinery Directive 2006/42/EC for European Union territory

Main Duties / Limits of use

Fluids compatible with materials of construction. Questions referring to chemical resistance, please consult us
Pressure / Temperature Rating to ASME B16.34. See section "Engineering & Performance Data"
For products compliant with Directive 2014/68/EU, observe also limits acc. to Annex II tables 6 & 8 (gases & liquids group 1*) and tables 7 & 9 (gases & liquids group 2*) up to category III
**Classification of fluids (group 1 or 2) acc. to Directive 2014/68/EU, Article 13*

Options

Different material combinations, different valve connections, worm gear, actuators, limit switches, cryogenic design, 3-Way T or L type, DPE-Double piston effect function, jacketed body, execution for aggressive atmosphere, underground application structure, compliance with NACE MR0175, etc. Please consult us

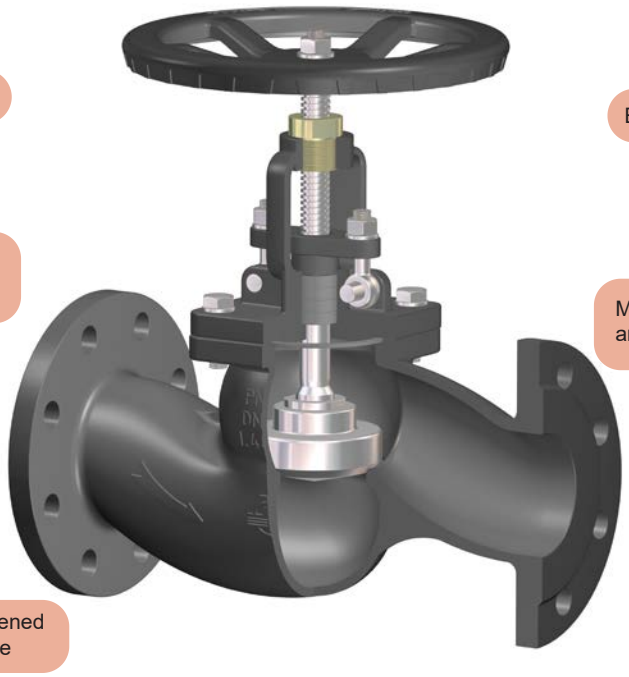
Series 80 DIN RANGE

Series 80 Globe Valves are linear motion valves devised for stopping the flow of the service fluid when necessary. They are bolted bonnet, outside screw and yoke, rising handwheel, being the closure element a disc seating against a precisely machined seat thus achieving the positive closure. The atmospheric sealing is achieved by flexible graphite rings. The flow comes upwards underneath the seat, being an unidirectional valve. Weir body leads to higher pressure drop compared to gate valves but operation is quicker and this feature allows to use the valve as regulating valve when arranged with throttling plug. Valves are of easy and safe operation being widely used in power, chemical and oil industry. The range is also comprehensive o a wide offer of different versions and options. The standard operation is achieved by handwheel or gear, depending on valve size and working pressure.



- Outside screw and yoke
- Ergonomic rising handwheel
- Precise machining of components for optimal performance
- Marking for identification and full traceability purpose
- Back Seat feature
- Great versatility in end connections, materials and configurations
- Seat surface can be hardened to increase wear resistance

Main Features / Reference Standards

Design: EN 13709
Pressure Design: PN40
Face to face length: EN558 S1 (DIN 3202 F1)
Valve end connections: Flanged to EN1092-1 type 21/B, PN40
Marking: EN19
Inspections & Tests: EN12266-1
Unidirectional design. See the arrow on the body for normal flow direction
Primer painted for protection during storage and transport (carbon steel body/bonnet)
Product compliant with Pressure Equipment Directive PED, up to category III for European territory

Main Duties / Limits of use

Fluids compatible with materials of construction
Pressure / Temperature Rating to EN 1092-1, refers to page 3.
For PED compliant products, limits also acc. to PED Annex II Tables 6, 7, 8 & 9, gases and liquids of fluid groups 1 & 2, up to category III
Questions referring to chemical resistance, please consult us

Options

Different body materials and trim combinations, different valve connections, angle pattern, Y-Pattern, regulating plug, extended bonnet, bellow seal, pressure seal, welded bonnet, chained hand wheel, manual gear, limit switches, execution for aggressive atmosphere, etc. Please consult us

Series 90 DIN RANGE

Series 90 Gate Valves are linear motion valves devised for stopping the flow of the service fluid when necessary, not being suitable for regulating purpose. They are bolted bonnet, outside screw and yoke, rising stem, bidirectional, with metal sealing and full bore. The atmospheric sealing is achieved by flexible graphite rings. The two slightly sloped seats favor a tight shut off, being largely used in the power, chemical and oil industry sectors. The range is also comprehensive of a wide offer of different versions and options. The standard operation is achieved by handwheel or gear, depending on valve size and working pressure. Valves can also be arranged for automation with different kinds of actuators.

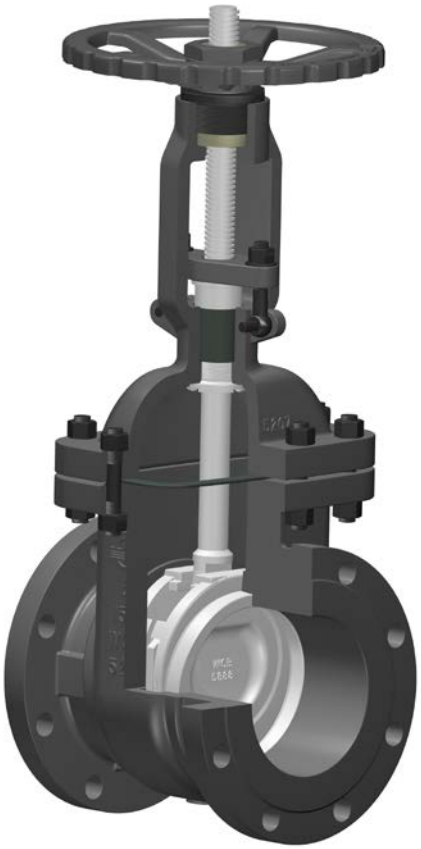
Precise machining of components for optimal performance

Outside screw and yoke, rising stem

Back Seat feature

Seat surface can be hardened to increase wear resistance

Flexible Wedge, favours the closure even at low pressures



Ergonomic non-rising handwheel

Marking for identification and full traceability purpose

Great versatility in end connections, materials and configurations

Sloped valve seats, vertical shut off, flow assists closure

Full bore, mínimum pressure drop

Main Features / Reference Standards

Design: DIN EN 1984
Pressure Rating: PN16-PN100
Face to face length: DIN 3202 F5/F7
Valve end connections: Flanged RF to EN 1092-1 Type 21
Welded BW to EN12627
Marking: MSS SP-25
Inspections & Tests: EN12266-1/2
Bidirectional design
Primer painted grey color similar to RAL 7037 for protection during storage and transport (carbon steel body/bonnet)
Product compliant with Pressure Equipment Directive PED, up to category III for European territory

Main Duties / Limits of use

Fluids compatible with materials of construction
Pressure / Temperature Rating to EN 1092-1.
For PED compliant products, limits also acc. to PED Annex II Tables 6, 7, 8 & 9, gases and liquids of fluid groups 1 & 2, up to category III
Questions referring to chemical resistance, please consult us
For installation in horizontal pipelines with stem pointing upwards. For other positions, please consult us.

Options

Different body materials and trim combinations, different valve connections, extended bonnet, bellow seal, pressure seal, welded bonnet, lantern ring with double packing, live loaded packing, chained hand wheel, manual gear, pneumatic, electric or hydraulic actuation, limit switches, execution for aggressive atmosphere, etc. Please consult us

Series 3P DIN RANGE

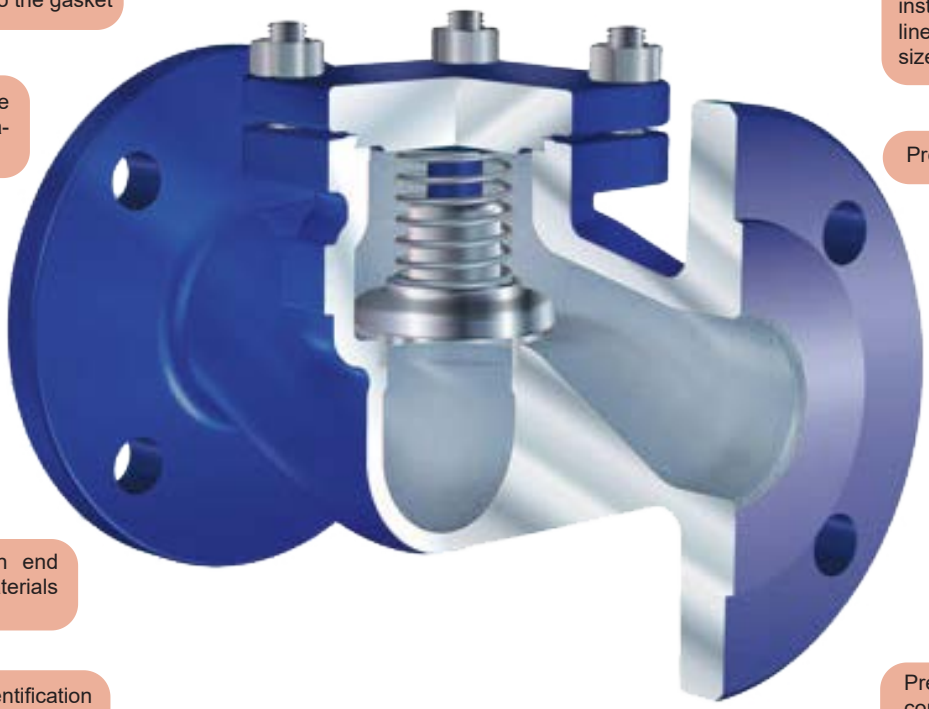
Check Valves are self-acting valves used for preventing the reverse of flow in a piping system. Series 3P are Piston Check Valves are provided with a guided piston which can be loaded by a spring and closes the disc against a horizontal valve seat. Piston Check Valves provide a larger pressure drop in the pipe line, this design permits a faster closure reaction and more tightness.

Body to cover joint design to apply uniform load to the gasket

Seat surface can be hardened to increase wear resistance

Great versatility in end connections, materials and configurations

Marking for identification and full traceability purpose



Spring loaded to allow installation on vertical lines (standard for small sizes)

Precise plug guidance

Precise machining of components for optimal performance

Main Features / Reference Standards

Design: EN 13709
Pressure Design: PN40
Face to face length: EN558 S1 (DIN 3202 F1)
Valve end connections: Flanged to EN1092-1 type 21/B, PN40
Marking: EN19
Inspections & Tests: EN12266-1
Unidirectional design. See the arrow on the body for normal flow direction
Primer painted for protection during storage and transport (carbon steel body/bonnet)
Product compliant with Pressure Equipment Directive PED, up to category III for European territory

Main Duties / Limits of use

Fluids compatible with materials of construction
Pressure / Temperature Rating to EN 1092-1, refers to page 3.
For PED compliant products, limits also acc. to PED Annex II Tables 6, 7, 8 & 9, gases and liquids of fluid groups 1 & 2, up to category III
Questions referring to chemical resistance, please consult us

Options

Diverse materials of construction and trim combinations, with or without spring, angle pattern, Y pattern, execution for turbulent flow or unstable condition, execution for aggressive atmosphere, etc. Please consult us

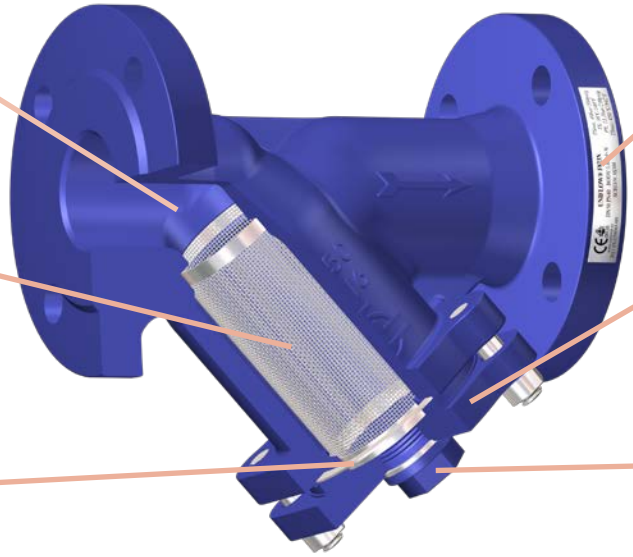
CE

SERIES F0A0 DIN RANGE

Y-Strainers type F0A0 DIN are devices for mechanically removing solids from flowing media by means of a wired mesh, replaceable in line. They combine a rugged and compact design for indoors installation in industrial plants, building industry, etc.



Precise machined seat slot, to accomodate the screen and avoid dirt to by-pass the strainer

St. steel screen, made out of high resistance wire, rugged and braided type

Reinforced graphite gasket, with. st. steel reinforcement

Nameplate incl. batch no. for full traceability

Removable bolting cover, to ease maintenance

Standard threaded blow-off connection, with metallic gasket, thus avoiding the gasket replacement on every emptying operation

Main Features

Valve design: EN 12516
Nominal pressure: PN40
Face to face length: EN 558 S1 (DIN 3202 F1)
End connections: Flanged to EN 1092-1 type 21/B PN40
Marking: EN 19
Pressure Tests: EN 12266-1
Inside and outside primer paint layer blue color similar to RAL5002
Product compliant with Directive 2014/68/EU on Pressure Equipment (PED)

Main Duties / Limits of use

Fluids compatible with materials of construction. Questions referring to chemical resistance, please consult us
Pressure / Temperature rating acc. to EN 1092-1 .
For products compliant with Directive 2014/68/EU, observe also limits acc. to Annex II tables 6 & 8 (gases & liquids group 1*) and tables 7 & 9 (gases & liquids group 2*) up to category III
**Classification of fluids (group 1 or 2) acc. to Directive 2014/68/EU, Article 13*

Options

Other screen width, special screen for vacuum service or in suction side of pumps, etc.
Other designs and approvals, please consult us.

SERIES F0I0 DIN RANGE

Y-strainers are devices for mechanically removing solids from flowing liquids or gases by means of a perforated wire mesh straining element. Series F0I0 DIN are compact, of cylindrical shape and designed to handle a vast majority of fluids encountered in the process industry such as demineralized water, ammonia, chemicals and gases. They protect equipment downstream and can be either horizontally or vertically installed. Maintenance is easy thanks to the removing screen. These strainers show low pressure drop across thanks to their shape and similarity to pipe line configuration. These Series are made in investment cast stainless steel which adds considerable quality finish to the surface avoiding roughness and pinholes risk.

Marking and tagging, positive flow marking by an arrow, raised symbols denoting heat numbers, Design Pressure and Nominal Diameter. Riveted steel plate in compliance with PED rules

High quality surface made out in investment cast stainless steel

Rugged stainless steel basket screen

Removable bolted cover, to ease maintenance

Raised flange ends and machined slots to better accommodating the assembling gaskets

Drainage screw, leakage proof for blow off maintenance operations

PTFE gasket to avoid deterioration by corrosive media, temperature constrains to PTFE

Main Features / Reference Standards

Valve design: EN 12516
Nominal pressure: PN16
Face to face length: EN 558 S1
Valve end connections: Flanges EN 1092-1 PN40 (DN15-DN50); PN16 (DN65-DN200)
Marking: EN 19
Inspections & Tests: EN 12266-1
Product compliant with Directive 2014/68/EU Pressure Equipment (PED)

Main Duties / Limits of use

Fluids compatible with materials of construction. Questions referring to chemical resistance, please consult us
Pressure / Temperature rating acc. to EN 1092-1
Pressure Rating: 16 bar (option 40 bar DN15-50)
For products compliant with Directive 2014/68/EU, observe also limits acc. to Annex II tables 6 & 8 (gases & liquids group 1*) and tables 7 & 9 (gases & liquids group 2*) up to category III
**Classification of fluids (group 1 or 2) acc. to Directive 2014/68/EU, Article 13*

Options

Other screen perforation, special screen for vacuum service, or in suction side of pumps, etc.
Other designs and approvals, please consult us.
