Knife gate valve HG

High performance through-going knife gate valve

Size range:
2" - 48" (DN 50 - DN 1200)

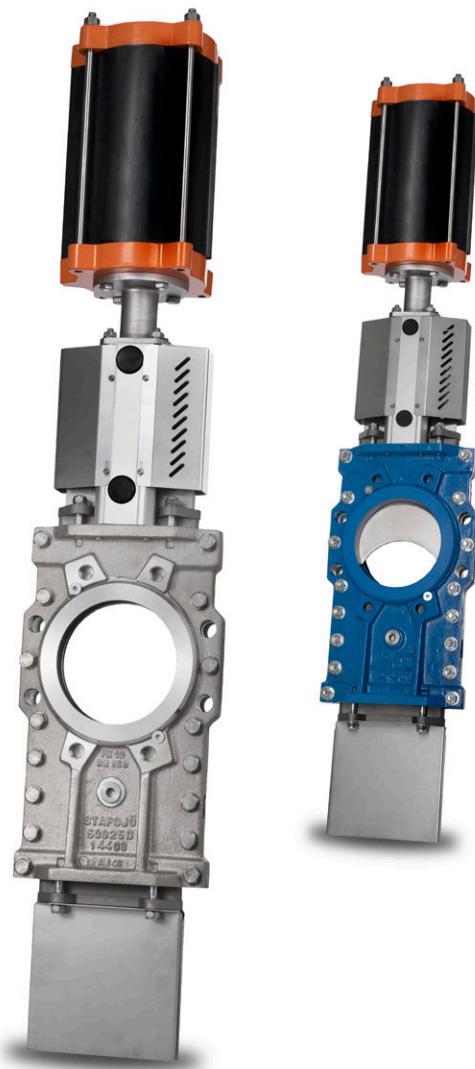

About HG

Stafsjö's HG is a through-going high performance knife gate valve with superior flow characteristics, offering reliable bi-directional zero leakage shut-off on highly concentrated media and static media columns.

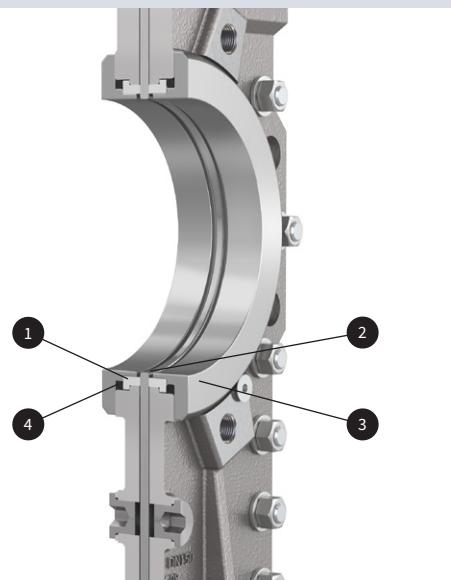

The HG knife gate valve is modular designed and can easily be customized in materials, with actuators and related automation accessories to different process conditions. It can operate on different media such as pulp stock up to 18% concentrations, slurry, liquor, ash and granulate. It is also widely used in junc traps, mostly as inlet valve with our RKO as discharge valve. The HG has a rigid two-piece precision machined valve body with a high strength top works that provide an essential and precise gate alignment. As standard it is available with a valve body in stainless steel or nodular iron, but it can also be supplied in a range of high alloy materials such as Duplex and 254 SMO equivalent material.

The HG valve is one out of five of Stafsjö's through-going knife gate valve models. The HP is a high pressure version of HG while the HL is a compact version. HPT is a high pressure version entirely made in Titanium and the HX is an extreme high pressure version.

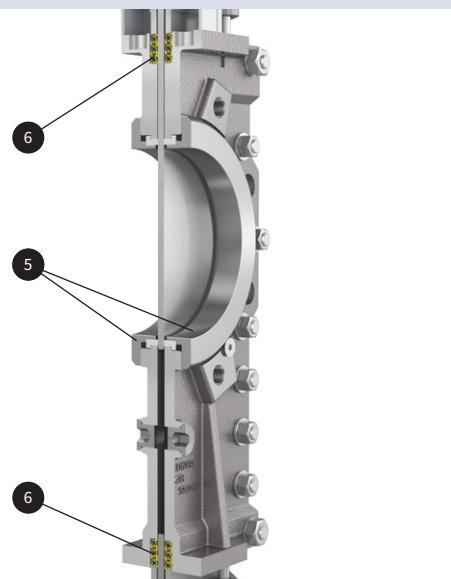

Full bore with outstanding flow characteristics

When the HG knife gate valve is in open position, it offers an unobstructed flow path where no media can collect. The PTFE seats (1) are protected by the gate (2) and retainer rings (3) and the internal back-up o-rings (4) keep the seats constantly pressurized against the gate. Polyurethane retainers/seats is an option for abrasive processes while the metal only is an extreme high temperature option.

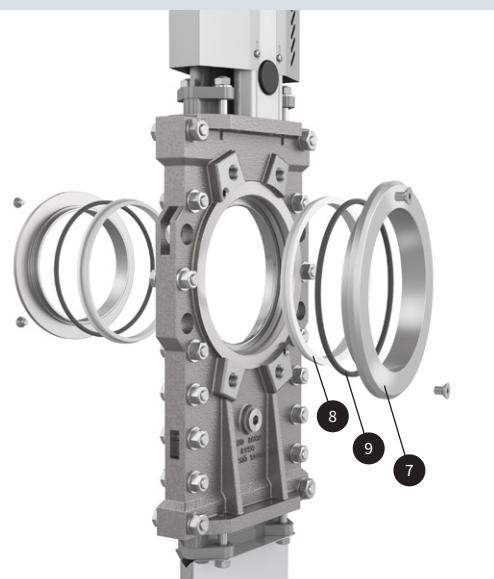

Reliable through-going and bi-directional zero leakage shut-off

The gate is guided throughout the entire stroke and operates smoothly through difficult and highly concentrated media. The retainer ring system (5) on both side of the gate provide a tight seal independent of pressure direction. The gland box sealing system with three layers of Stafsjö's TwinPack (6) ensures that no media reaches surrounding environment. Extra scrapers or double gland can be used for the most demanding services.

Quick and easy maintenance

The retainer rings (7) hold the seats (8) and the back-up o-rings (9) in exact correct position as the gate strokes. They are mechanically locked and can easily be removed for seat change. Both the retainer rings and seats are available in different materials which makes it easy to customize HG to different process conditions.

Pressure class

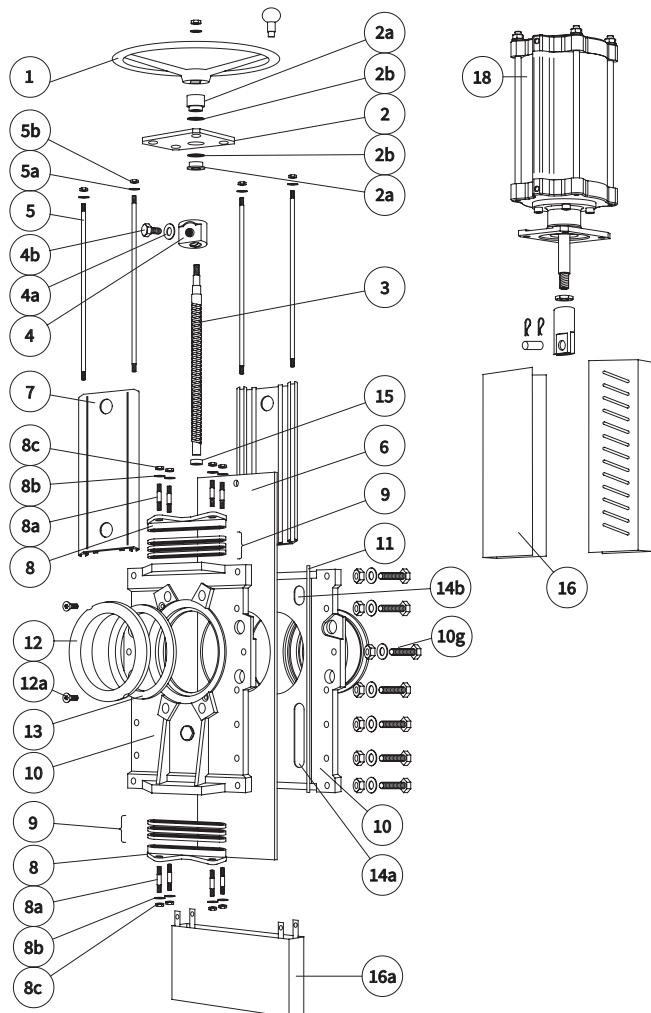

Max working pressure at 68 °F		Max differential pressure at 68 °F	
NPS	psi/bar	NPS	psi/bar

Configurations

Standard in stainless steel	Standard in nodular iron
Sizes: 2" - 48"	Sizes: 3" - 24"
Valve body: Stainless steel EN 1.4408	
Retainer rings: Stainless steel EN 1.4408	Valve body: Nodular iron EN 5.3105
Gate: Stainless steel EN 1.4404, AISI 316L	Retainer rings: Nodular iron EN 5.3105, EN-JS1050. 24": Stainless steel EN 1.4408
Box packing: TwinPack	Gate: Stainless steel EN 1.4404, AISI 316L
Top works: Stainless steel tie rods encapsulated in aluminum beams up to 40" and stainless steel beams on larger ones including stainless steel gate guards on automated valves	Box packing: TwinPack
Top works: Stainless steel tie rods encapsulated in aluminum beams including stainless steel gate guards on automated valve	
Options	
Valve body ¹⁾	Box packings
Nodular iron EN 5.3105	TwinPack, WhitePack, Graphite or FDA/EC 1935/2004 approved PTFE
Stainless steel EN 1.4408	Extra scrapers in UHMW-PE, PTFE or brass
Duplex stainless steel EN 1.4470	
254 SMO stainless steel equivalent	
Retainer rings	Top works
Nodular iron EN 5.3105, EN-JS1050	Stainless steel tie rods encapsulated in aluminum beams
Stainless steel EN 1.4408	Stainless steel pillars ²⁾ or beams
Duplex stainless steel EN 1.4470	
254 SMO stainless steel or equivalent	
Polyurethane	
Gate material and surface treatments	Actuators
Stainless steel EN 1.4404, AISI 316L	Bevel gear
Duplex stainless steel EN 1.4462, S32205	Chain wheel
254 SMO stainless steel or equivalent	Hand wheel with non-rising stem
Hard chromed surface	Double-acting pneumatic cylinder
Extra polished surface (max Ra 0,8)	Single-acting pneumatic cylinder
	Electric actuator
	Hydraulic actuator
Seats	Flange drillings
PTFE with o-ring in NBR, EPDM or FKM/FPM	EN 1092 PN 10
FDA/EC 1935/2004 approved PTFE	EN 1092 PN 16
Polyurethane	ASME/ANSI B16.5 and B16.47 Class 150, series A
Stainless steel with grafoil tape or o-rings in NBR, EPDM or FKM/FPM	JIS B 2238 10K
	BS 10 Table D
	AS 2129 Table D and E on request
Accessories	
See Stafsjö's accessory data sheet for further information.	
Design standards	
Design, manufacturing, inspection and test	Face-to-face dimensions
According to pressure equipment directive 2014/68/EU category I and II module A2. The valves are CE marked when it is applicable.	Stafsjö manufacturing standard. Option in MSS-SP81.
Stafsjö's valves are subject for pressure tests before delivery in opened and closed position with water at 68 °F according to EN 12266-1:2003 rate A. No visually detectable leakage is allowed for duration of the test. Rate A is not applicable on metal seated valves.	Corrosion protection
On request Stafsjö can provide 2.2 test report and 3.1 inspection certificate according to EN 10204.	Painted valve parts fulfill in applicable areas corrosion protection against environment according EN ISO 12944, corrosivity category C3. Other paint systems can be offered on request.
Contact Stafsjö for further information on ATEX approved solutions.	

1) The valve body is as standard supplied with purge ports from 4": G1/2"

2) Standard on valves supplied with valve body in duplex or equivalent material to 254 SMO stainless steel.

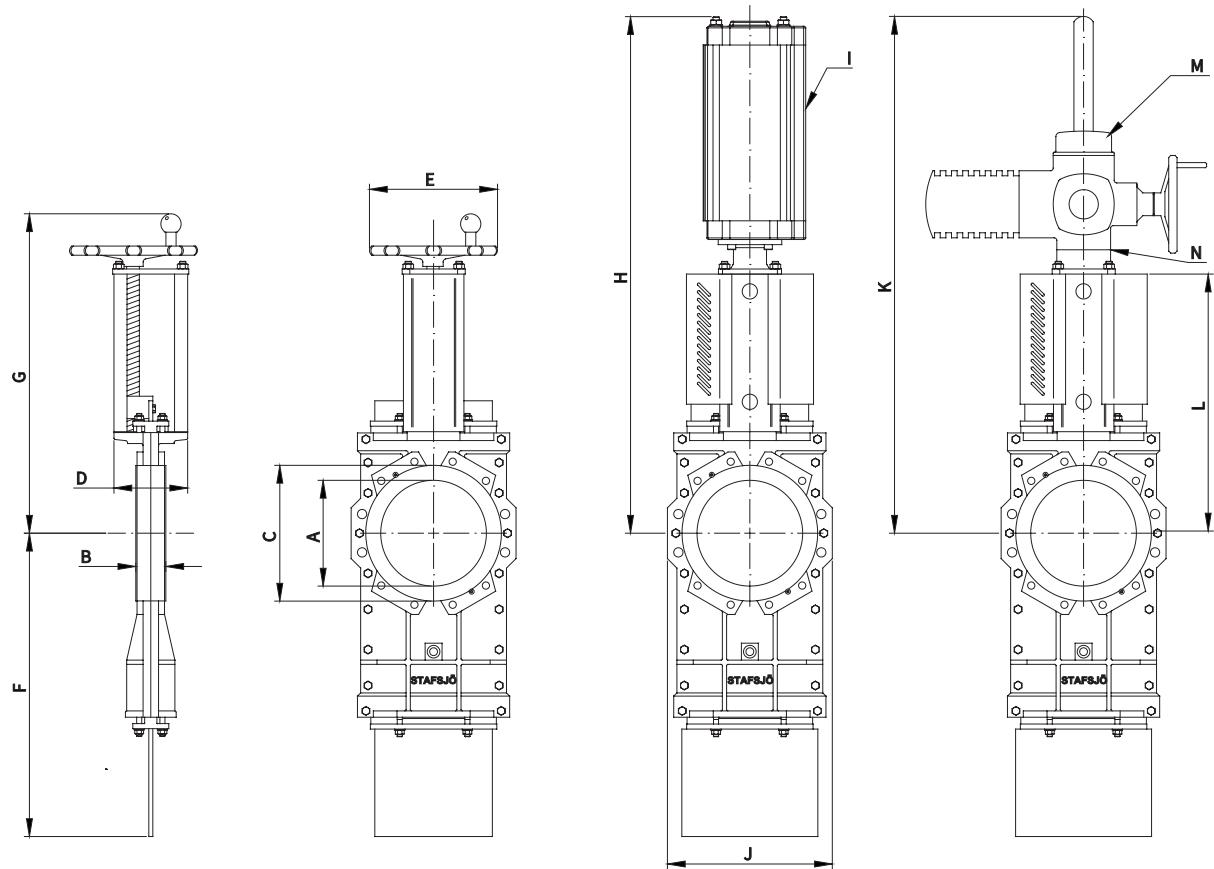

Part list

Pos.	Part	Material
1	Hand wheel	Coated cast iron Ø 8" - Ø 12" EN-JL1040, GG25, ≥ Ø 16" EN-JL1030, GG20
2	Yoke	Stainless steel EN 1.4301

1) Recommended sizing of double-acting pneumatic cylinder type SC at normal operation with 5 bar air pressure. For other operating conditions, contact Stafsjö or your local representative for advice.

2) Recommended sizing of Auma SA electric motors at normal operation. For other operating conditions, contact Stafsjö or your local representative for advice.

3) Valve and Auma SA interface. The electric motors are mounted as standard according to ISO 5210 connection A (rising stem).

4) Weight in lbs for valve with hand wheel (HW)
